NSCLC-Radiomics LUNG1
Teaching atlas

134-slice axial chest CT cine, translated from the Board Studio slow dictation.
Each anatomy station is expanded across three imaging windows.
Split screen: LEFT = normal anatomy · RIGHT = same slice with the teaching lesion superimposed.

Not the TCIA source DICOM. Not a radiology report. Education only.

Contents

1. How to use windows and split screen
2. Nine anatomy stations × lung / mediastinum / bone
3. Full 134-slice dictation log (the spoken script)
4. Honesty and limits

1. Windows, split screen, and the search pattern

Chest CT is not one picture. You change the window, then you change the question. Lung window for parenchyma and nodules. Mediastinal window for nodes, vessels, and heart. Bone window for cortex, ribs, and vertebrae. The cine in Board Studio toggles the same three palettes.

LUNG WINDOW

WW ~1500 HU · WL ~-600 HU · parenchyma, nodules, airways

MEDIASTINAL WINDOW

WW ~350 HU · WL ~40 HU · nodes, vessels, heart, fat planes

BONE WINDOW

WW ~2000 HU · WL ~300 HU · cortex, ribs, vertebrae, hardware

Split-screen capability: the left pane is the normal teaching map for that slice. The right pane is the identical geometry with the NSCLC RUL mass superimposed when the slice falls in the 28–50% band (approximately slices 38–67). Scroll in the app and the dictation continues; this PDF freezes every spoken line.

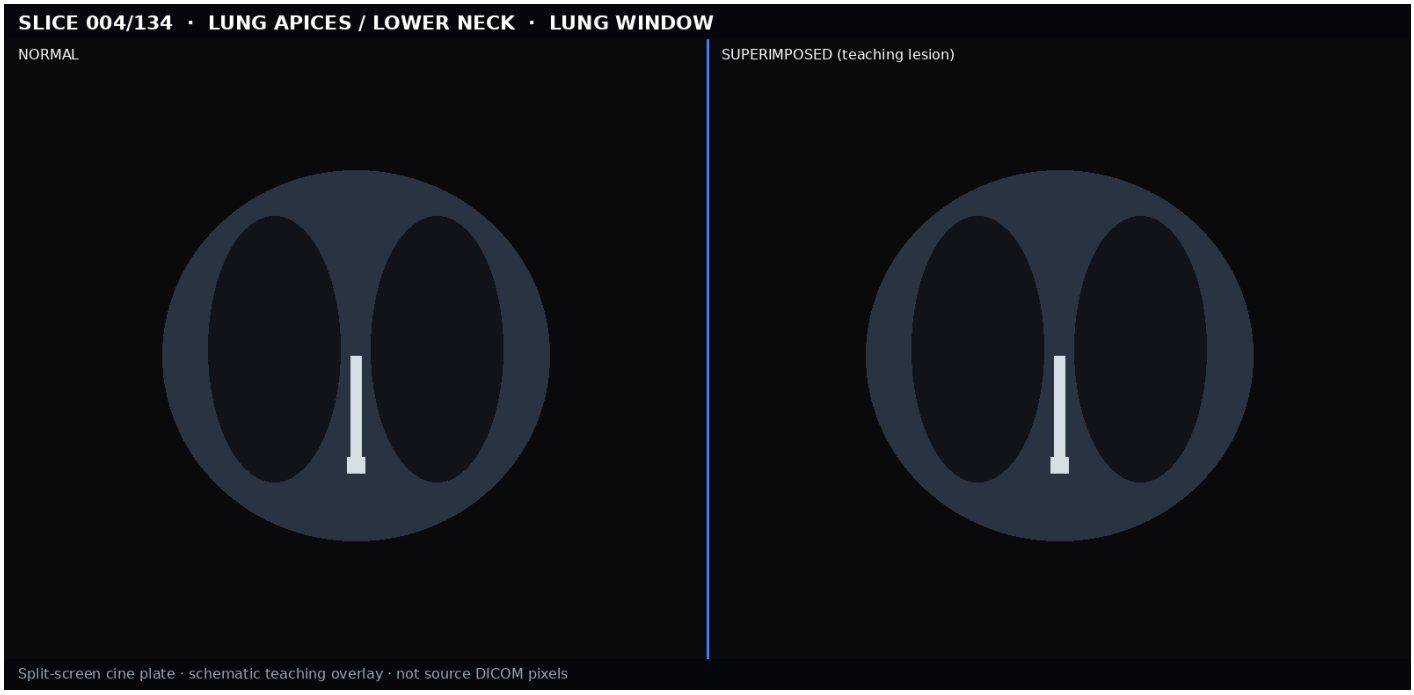

Search order on every slice: lungs → mediastinum → bone → tubes and lines → review the left-right comparison. If you annotated a slice in the app, that note is local to your browser and is not printed here.

2. Anatomy stations expanded by imaging window

Nine contiguous bands cover slices 001–134. Each station has three split-screen plates (lung, mediastinum, bone) and the dictation that plays when you stop on that band.

LUNG APICES / LOWER NECK

LUNG WINDOW · representative slice 004 / 134 · band slices 1–7

Anatomy (expanded)

Lung apices, C7–T1, midline trachea, thyroid, sternocleidomastoid, extra-pleural apical fat.

How to read this window

Search apices for Pancoast mass, thyroid nodules, tracheal deviation, apical scarring.

Window: WW ~1500 HU · WL ~-600 HU · parenchyma, nodules, airways

Slow dictation (this slice)

Slice 4 of 134. Axial chest CT. NSCLC chest CT teaching series. Station LUNG APICES / LOWER NECK. Anatomy on this slice: Lung apices, C7–T1, midline trachea, thyroid, sternocleidomastoid, extra-pleural apical fat. How to read it: Search apices for Pancoast mass, thyroid nodules, tracheal deviation, apical scarring. No mass mapped at this exact level. Still search lungs, mediastinum, bone, and support devices. Read lung window, then mediastinum, then bone. Split screen: LEFT normal anatomy, RIGHT same slice with the teaching lesion superimposed.

LUNG APICES / LOWER NECK

MEDIASTINAL WINDOW · representative slice 004 / 134 · band slices 1–7

Anatomy (expanded)

Lung apices, C7–T1, midline trachea, thyroid, sternocleidomastoid, extra-pleural apical fat.

How to read this window

Search apices for Pancoast mass, thyroid nodules, tracheal deviation, apical scarring.

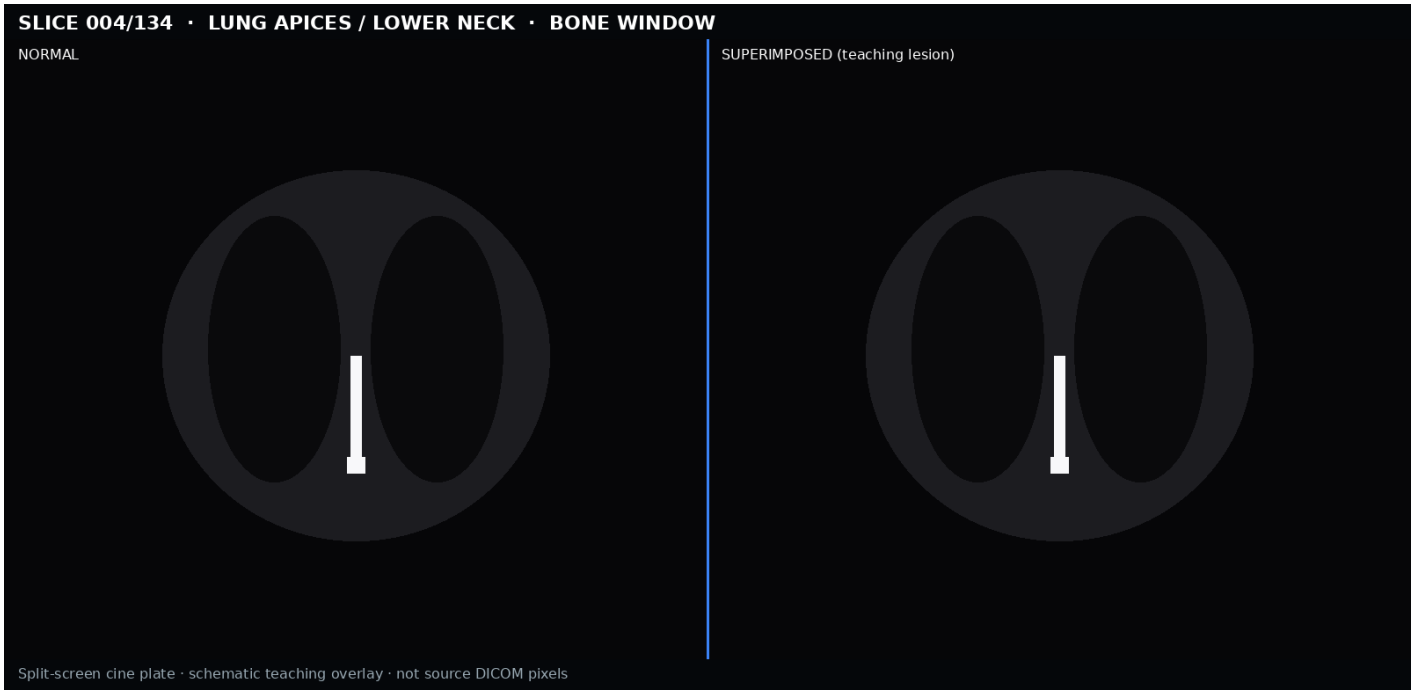

Window: WW ~350 HU · WL ~40 HU · nodes, vessels, heart, fat planes

Slow dictation (this slice)

Slice 4 of 134. Axial chest CT. NSCLC chest CT teaching series. Station LUNG APICES / LOWER NECK. Anatomy on this slice: Lung apices, C7–T1, midline trachea, thyroid, sternocleidomastoid, extra-pleural apical fat. How to read it: Search apices for Pancoast mass, thyroid nodules, tracheal deviation, apical scarring. No mass mapped at this exact level. Still search lungs, mediastinum, bone, and support devices. Read lung window, then mediastinum, then bone. Split screen: LEFT normal anatomy, RIGHT same slice with the teaching lesion superimposed.

LUNG APICES / LOWER NECK

BONE WINDOW · representative slice 004 / 134 · band slices 1–7

Anatomy (expanded)

Lung apices, C7–T1, midline trachea, thyroid, sternocleidomastoid, extra-pleural apical fat.

How to read this window

Search apices for Pancoast mass, thyroid nodules, tracheal deviation, apical scarring.

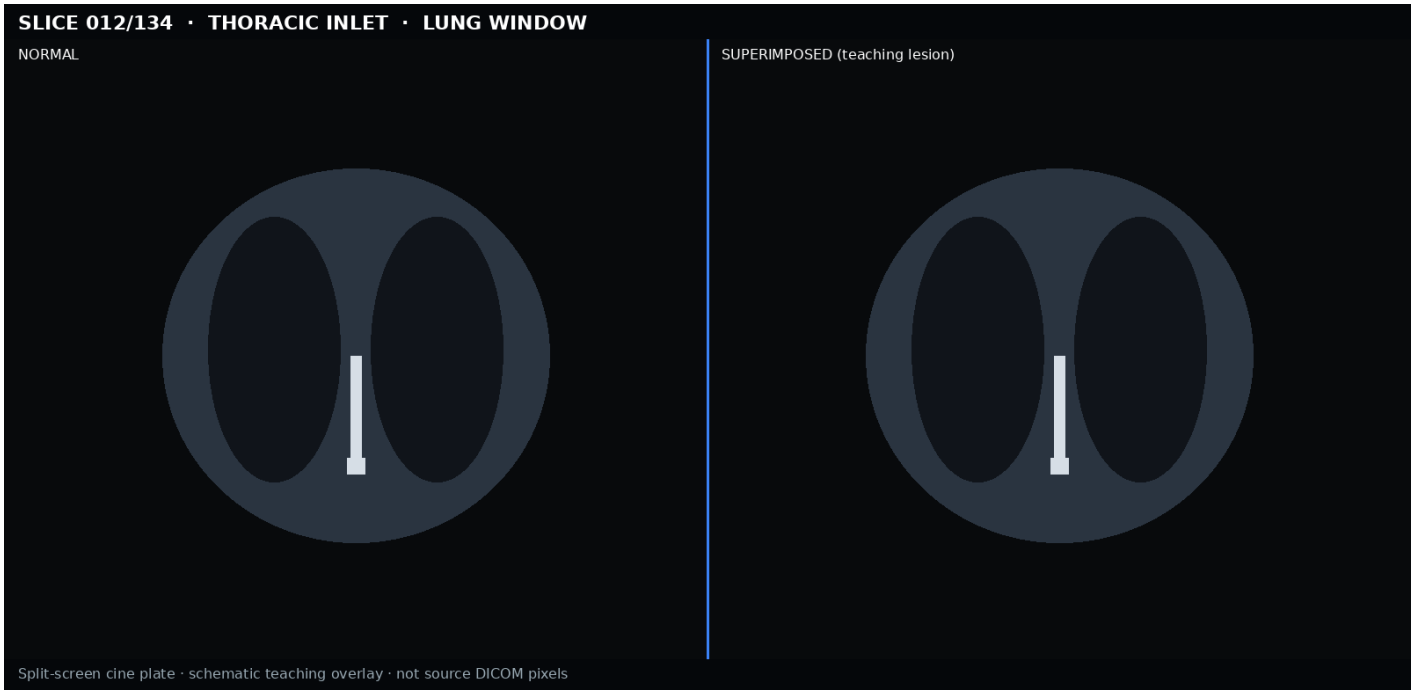

Window: WW ~2000 HU · WL ~300 HU · cortex, ribs, vertebrae, hardware

Slow dictation (this slice)

Slice 4 of 134. Axial chest CT. NSCLC chest CT teaching series. Station LUNG APICES / LOWER NECK. Anatomy on this slice: Lung apices, C7–T1, midline trachea, thyroid, sternocleidomastoid, extra-pleural apical fat. How to read it: Search apices for Pancoast mass, thyroid nodules, tracheal deviation, apical scarring. No mass mapped at this exact level. Still search lungs, mediastinum, bone, and support devices. Read lung window, then mediastinum, then bone. Split screen: LEFT normal anatomy, RIGHT same slice with the teaching lesion superimposed.

THORACIC INLET

LUNG WINDOW · representative slice 012 / 134 · band slices 8–16

Anatomy (expanded)

Sternoclavicular joints, lung apices, esophagus, brachiocephalic veins, brachial-plexus fat.

How to read this window

Inlet mass, lymphadenopathy, clavicles, first ribs.

Window: WW ~1500 HU · WL ~-600 HU · parenchyma, nodules, airways

Slow dictation (this slice)

Slice 12 of 134. Axial chest CT. NSCLC chest CT teaching series. Station THORACIC INLET. Anatomy on this slice: Sternoclavicular joints, lung apices, esophagus, brachiocephalic veins, brachial-plexus fat. How to read it: Inlet mass, lymphadenopathy, clavicles, first ribs. No mass mapped at this exact level. Still search lungs, mediastinum, bone, and support devices. Read lung window, then mediastinum, then bone. Split screen: LEFT normal anatomy, RIGHT same slice with the teaching lesion superimposed.

THORACIC INLET

MEDIASTINAL WINDOW · representative slice 012 / 134 · band slices 8–16

Anatomy (expanded)

Sternoclavicular joints, lung apices, esophagus, brachiocephalic veins, brachial-plexus fat.

How to read this window

Inlet mass, lymphadenopathy, clavicles, first ribs.

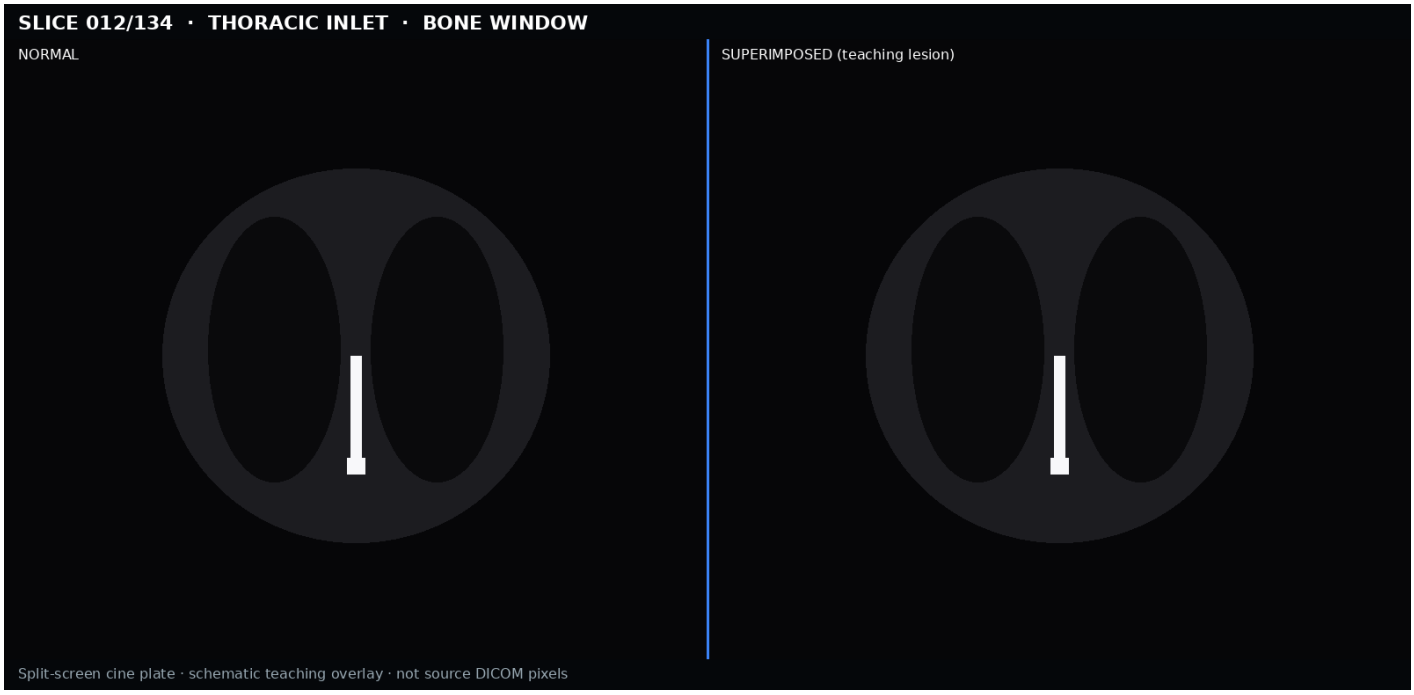

Window: WW ~350 HU · WL ~40 HU · nodes, vessels, heart, fat planes

Slow dictation (this slice)

Slice 12 of 134. Axial chest CT. NSCLC chest CT teaching series. Station THORACIC INLET. Anatomy on this slice: Sternoclavicular joints, lung apices, esophagus, brachiocephalic veins, brachial-plexus fat. How to read it: Inlet mass, lymphadenopathy, clavicles, first ribs. No mass mapped at this exact level. Still search lungs, mediastinum, bone, and support devices. Read lung window, then mediastinum, then bone. Split screen: LEFT normal anatomy, RIGHT same slice with the teaching lesion superimposed.

THORACIC INLET

BONE WINDOW · representative slice 012 / 134 · band slices 8–16

Anatomy (expanded)

Sternoclavicular joints, lung apices, esophagus, brachiocephalic veins, brachial-plexus fat.

How to read this window

Inlet mass, lymphadenopathy, clavicles, first ribs.

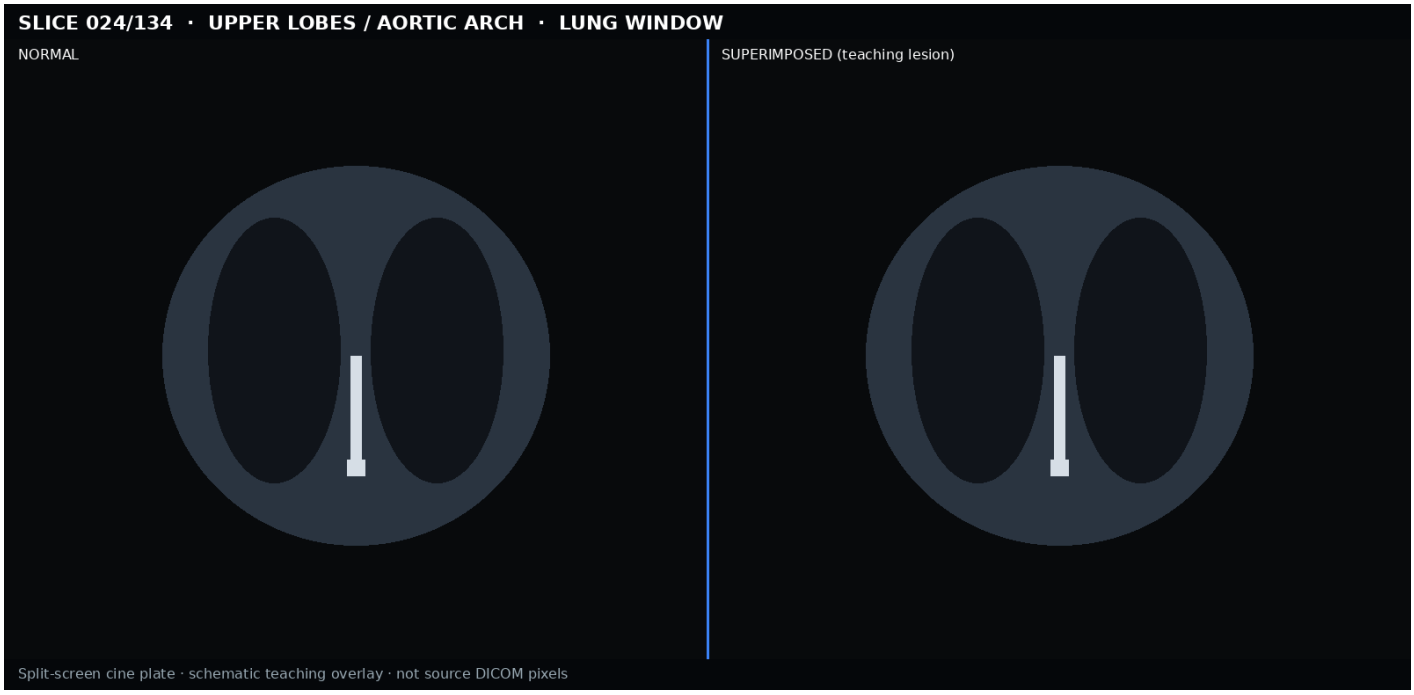

Window: WW ~2000 HU · WL ~300 HU · cortex, ribs, vertebrae, hardware

Slow dictation (this slice)

Slice 12 of 134. Axial chest CT. NSCLC chest CT teaching series. Station THORACIC INLET. Anatomy on this slice: Sternoclavicular joints, lung apices, esophagus, brachiocephalic veins, brachial-plexus fat. How to read it: Inlet mass, lymphadenopathy, clavicles, first ribs. No mass mapped at this exact level. Still search lungs, mediastinum, bone, and support devices. Read lung window, then mediastinum, then bone. Split screen: LEFT normal anatomy, RIGHT same slice with the teaching lesion superimposed.

UPPER LOBES / AORTIC ARCH

LUNG WINDOW · representative slice 024 / 134 · band slices 17–29

Anatomy (expanded)

Aortic arch, SVC, trachea, upper lobes, prevascular fat.

How to read this window

Mediastinal nodes, aortic aneurysm, RUL and LUL parenchyma.

Window: WW ~1500 HU · WL ~-600 HU · parenchyma, nodules, airways

Slow dictation (this slice)

Slice 24 of 134. Axial chest CT. NSCLC chest CT teaching series. Station UPPER LOBES / AORTIC ARCH. Anatomy on this slice: Aortic arch, SVC, trachea, upper lobes, prevascular fat. How to read it: Mediastinal nodes, aortic aneurysm, RUL and LUL parenchyma. No mass mapped at this exact level. Still search lungs, mediastinum, bone, and support devices. Read lung window, then mediastinum, then bone. Split screen: LEFT normal anatomy, RIGHT same slice with the teaching lesion superimposed.

UPPER LOBES / AORTIC ARCH

MEDIASTINAL WINDOW · representative slice 024 / 134 · band slices 17–29

Anatomy (expanded)

Aortic arch, SVC, trachea, upper lobes, prevascular fat.

How to read this window

Mediastinal nodes, aortic aneurysm, RUL and LUL parenchyma.

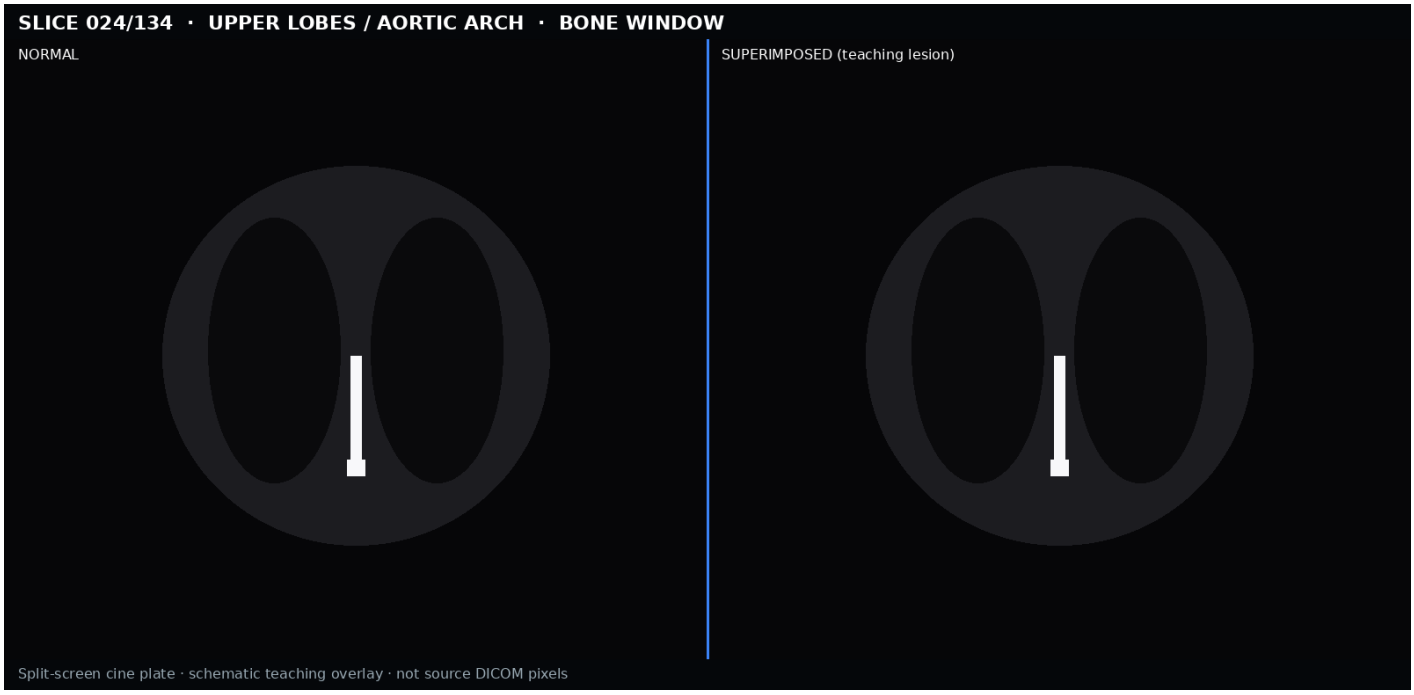

Window: WW ~350 HU · WL ~40 HU · nodes, vessels, heart, fat planes

Slow dictation (this slice)

Slice 24 of 134. Axial chest CT. NSCLC chest CT teaching series. Station UPPER LOBES / AORTIC ARCH. Anatomy on this slice: Aortic arch, SVC, trachea, upper lobes, prevascular fat. How to read it: Mediastinal nodes, aortic aneurysm, RUL and LUL parenchyma. No mass mapped at this exact level. Still search lungs, mediastinum, bone, and support devices. Read lung window, then mediastinum, then bone. Split screen: LEFT normal anatomy, RIGHT same slice with the teaching lesion superimposed.

UPPER LOBES / AORTIC ARCH

BONE WINDOW · representative slice 024 / 134 · band slices 17–29

Anatomy (expanded)

Aortic arch, SVC, trachea, upper lobes, prevascular fat.

How to read this window

Mediastinal nodes, aortic aneurysm, RUL and LUL parenchyma.

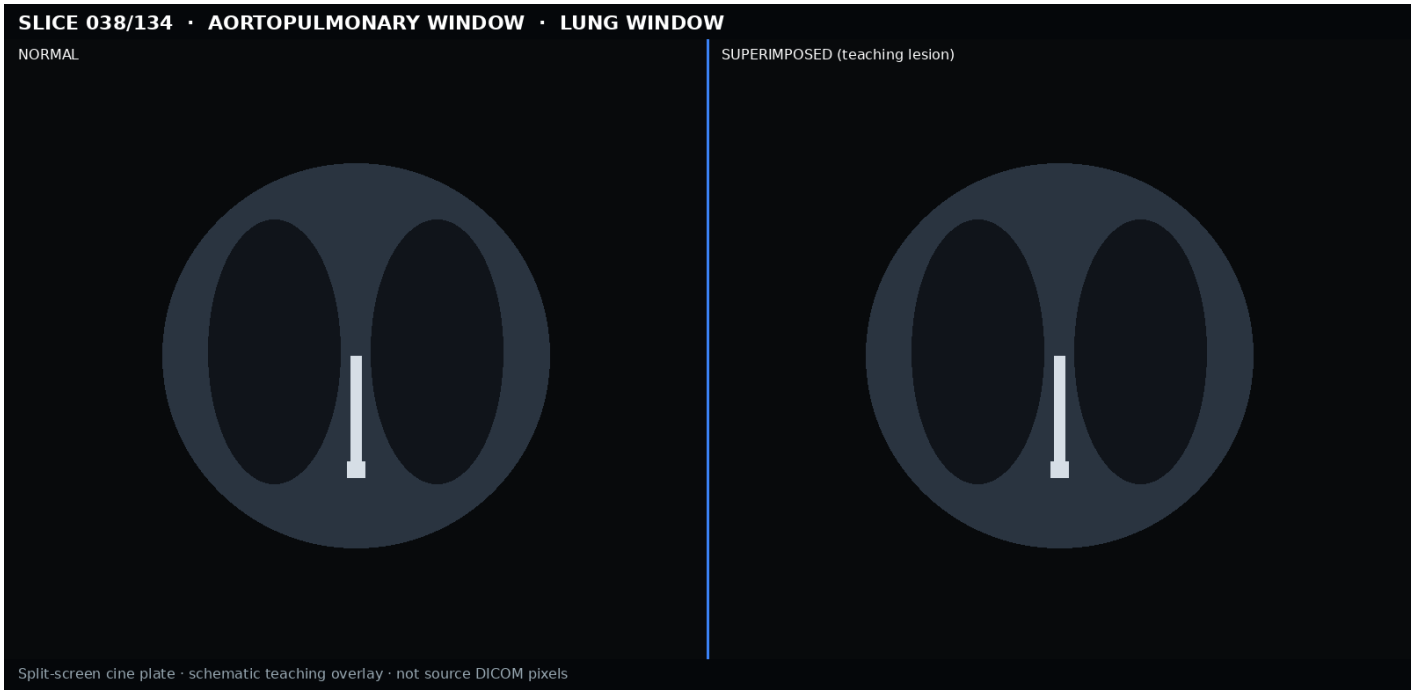

Window: WW ~2000 HU · WL ~300 HU · cortex, ribs, vertebrae, hardware

Slow dictation (this slice)

Slice 24 of 134. Axial chest CT. NSCLC chest CT teaching series. Station UPPER LOBES / AORTIC ARCH. Anatomy on this slice: Aortic arch, SVC, trachea, upper lobes, prevascular fat. How to read it: Mediastinal nodes, aortic aneurysm, RUL and LUL parenchyma. No mass mapped at this exact level. Still search lungs, mediastinum, bone, and support devices. Read lung window, then mediastinum, then bone. Split screen: LEFT normal anatomy, RIGHT same slice with the teaching lesion superimposed.

AORTOPULMONARY WINDOW

LUNG WINDOW · representative slice 038 / 134 · band slices 30–45

Anatomy (expanded)

AP window, main PA, carina approaching, upper-lobe bronchi.

How to read this window

AP-window nodes. RUL mass typical of NSCLC teaching cases sits near this band.

Window: WW ~1500 HU · WL ~-600 HU · parenchyma, nodules, airways

Slow dictation (this slice)

Slice 38 of 134. Axial chest CT. NSCLC chest CT teaching series. Station AORTOPULMONARY WINDOW. Anatomy on this slice: AP window, main PA, carina approaching, upper-lobe bronchi. How to read it: AP-window nodes. RUL mass typical of NSCLC teaching cases sits near this band. No mass mapped at this exact level. Still search lungs, mediastinum, bone, and support devices. Read lung window, then mediastinum, then bone. Split screen: LEFT normal anatomy, RIGHT same slice with the teaching lesion superimposed.

AORTOPULMONARY WINDOW

MEDIASTINAL WINDOW · representative slice 038 / 134 · band slices 30–45

Anatomy (expanded)

AP window, main PA, carina approaching, upper-lobe bronchi.

How to read this window

AP-window nodes. RUL mass typical of NSCLC teaching cases sits near this band.

Window: WW ~350 HU · WL ~40 HU · nodes, vessels, heart, fat planes

Slow dictation (this slice)

Slice 38 of 134. Axial chest CT. NSCLC chest CT teaching series. Station AORTOPULMONARY WINDOW. Anatomy on this slice: AP window, main PA, carina approaching, upper-lobe bronchi. How to read it: AP-window nodes. RUL mass typical of NSCLC teaching cases sits near this band. No mass mapped at this exact level. Still search lungs, mediastinum, bone, and support devices. Read lung window, then mediastinum, then bone. Split screen: LEFT normal anatomy, RIGHT same slice with the teaching lesion superimposed.

AORTOPULMONARY WINDOW

BONE WINDOW · representative slice 038 / 134 · band slices 30–45

Anatomy (expanded)

AP window, main PA, carina approaching, upper-lobe bronchi.

How to read this window

AP-window nodes. RUL mass typical of NSCLC teaching cases sits near this band.

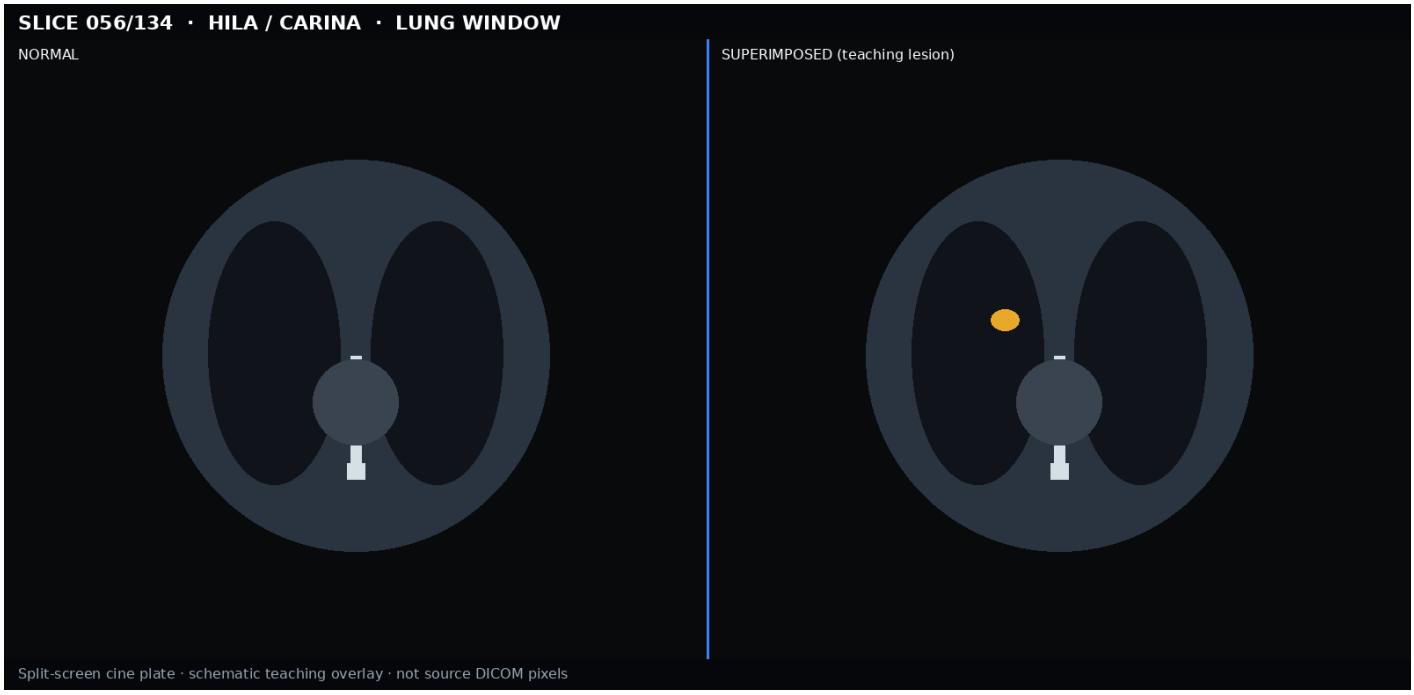

Window: WW ~2000 HU · WL ~300 HU · cortex, ribs, vertebrae, hardware

Slow dictation (this slice)

Slice 38 of 134. Axial chest CT. NSCLC chest CT teaching series. Station AORTOPULMONARY WINDOW. Anatomy on this slice: AP window, main PA, carina approaching, upper-lobe bronchi. How to read it: AP-window nodes. RUL mass typical of NSCLC teaching cases sits near this band. No mass mapped at this exact level. Still search lungs, mediastinum, bone, and support devices. Read lung window, then mediastinum, then bone. Split screen: LEFT normal anatomy, RIGHT same slice with the teaching lesion superimposed.

HILA / CARINA

LUNG WINDOW · representative slice 056 / 134 · band slices 46–64

Anatomy (expanded)

Carina, main bronchi, hilar vessels, azygos, upper heart border.

How to read this window

Hilar nodes, endobronchial lesion. Measure any RUL spiculated mass on lung then mediastinum.

Window: WW ~1500 HU · WL ~-600 HU · parenchyma, nodules, airways

Slow dictation (this slice)

Slice 56 of 134. Axial chest CT. NSCLC chest CT teaching series. Station HILA / CARINA. Anatomy on this slice: Carina, main bronchi, hilar vessels, azygos, upper heart border. How to read it: Hilar nodes, endobronchial lesion. Measure any RUL spiculated mass on lung then mediastinum. Teaching lesion: spiculated right-upper-lobe mass at this level, NSCLC-Radiomics LUNG1 pattern. Window lung then mediastinum. Check chest wall, fissure, and nodes. Read lung window, then mediastinum, then bone. Split screen: LEFT normal anatomy, RIGHT same slice with the teaching lesion superimposed.

HILA / CARINA

MEDIASTINAL WINDOW · representative slice 056 / 134 · band slices 46–64

Anatomy (expanded)

Carina, main bronchi, hilar vessels, azygos, upper heart border.

How to read this window

Hilar nodes, endobronchial lesion. Measure any RUL spiculated mass on lung then mediastinum.

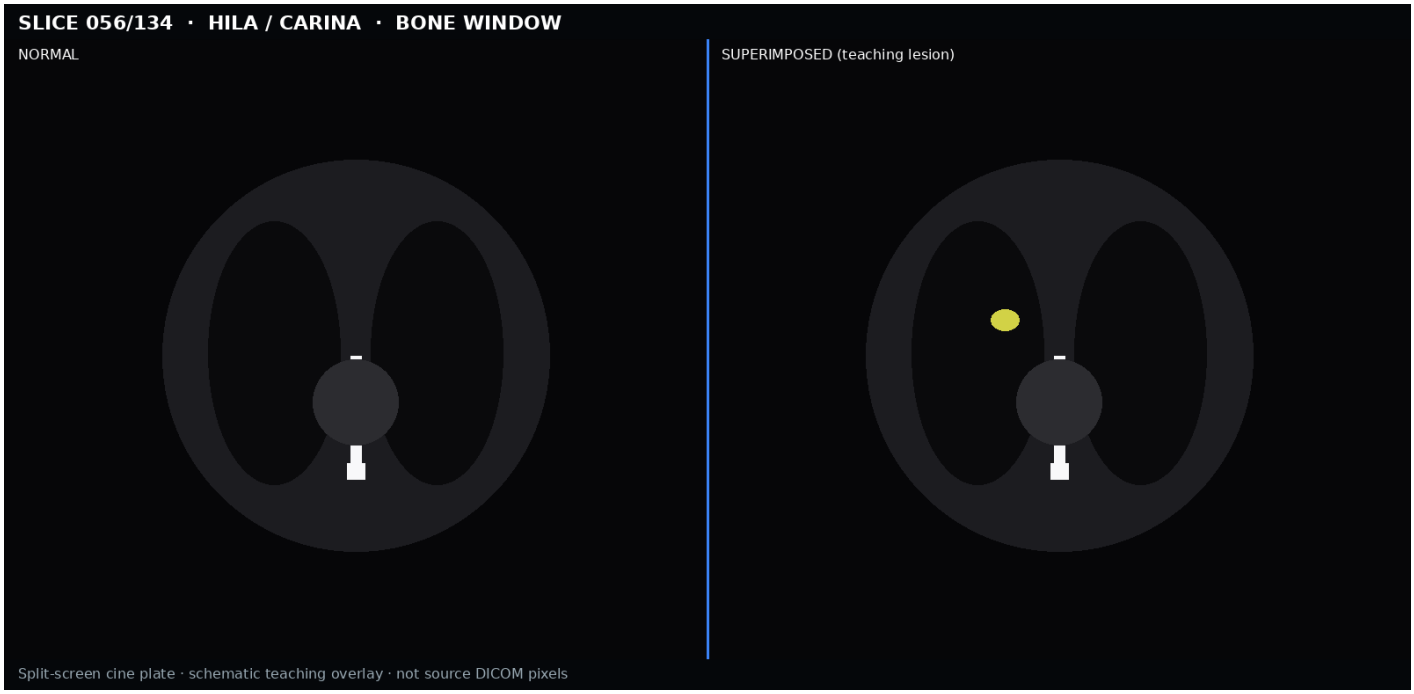

Window: WW ~350 HU · WL ~40 HU · nodes, vessels, heart, fat planes

Slow dictation (this slice)

Slice 56 of 134. Axial chest CT. NSCLC chest CT teaching series. Station HILA / CARINA. Anatomy on this slice: Carina, main bronchi, hilar vessels, azygos, upper heart border. How to read it: Hilar nodes, endobronchial lesion. Measure any RUL spiculated mass on lung then mediastinum. Teaching lesion: spiculated right-upper-lobe mass at this level, NSCLC-Radiomics LUNG1 pattern. Window lung then mediastinum. Check chest wall, fissure, and nodes. Read lung window, then mediastinum, then bone. Split screen: LEFT normal anatomy, RIGHT same slice with the teaching lesion superimposed.

HILA / CARINA

BONE WINDOW · representative slice 056 / 134 · band slices 46–64

Anatomy (expanded)

Carina, main bronchi, hilar vessels, azygos, upper heart border.

How to read this window

Hilar nodes, endobronchial lesion. Measure any RUL spiculated mass on lung then mediastinum.

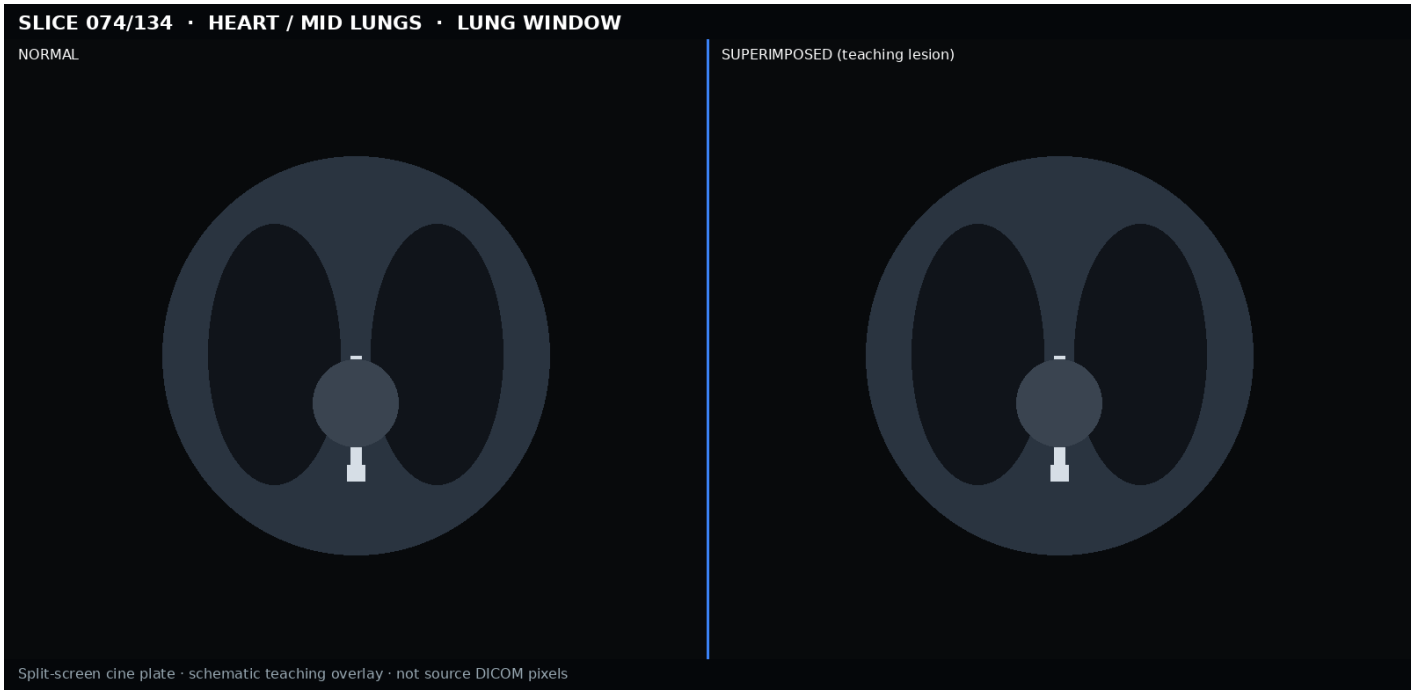

Window: WW ~2000 HU · WL ~300 HU · cortex, ribs, vertebrae, hardware

Slow dictation (this slice)

Slice 56 of 134. Axial chest CT. NSCLC chest CT teaching series. Station HILA / CARINA. Anatomy on this slice: Carina, main bronchi, hilar vessels, azygos, upper heart border. How to read it: Hilar nodes, endobronchial lesion. Measure any RUL spiculated mass on lung then mediastinum. Teaching lesion: spiculated right-upper-lobe mass at this level, NSCLC-Radiomics LUNG1 pattern. Window lung then mediastinum. Check chest wall, fissure, and nodes. Read lung window, then mediastinum, then bone. Split screen: LEFT normal anatomy, RIGHT same slice with the teaching lesion superimposed.

HEART / MID LUNGS

LUNG WINDOW · representative slice 074 / 134 · band slices 65–83

Anatomy (expanded)

Four cardiac chambers, coronary grooves, mid-lobe and lingula, descending aorta.

How to read this window

Heart size, pericardium, pulmonary embolus in PA, lower-lobe nodules.

Window: WW ~1500 HU · WL ~-600 HU · parenchyma, nodules, airways

Slow dictation (this slice)

Slice 74 of 134. Axial chest CT. NSCLC chest CT teaching series. Station HEART / MID LUNGS. Anatomy on this slice: Four cardiac chambers, coronary grooves, mid-lobe and lingula, descending aorta. How to read it: Heart size, pericardium, pulmonary embolus in PA, lower-lobe nodules. No mass mapped at this exact level. Still search lungs, mediastinum, bone, and support devices. Read lung window, then mediastinum, then bone. Split screen: LEFT normal anatomy, RIGHT same slice with the teaching lesion superimposed.

HEART / MID LUNGS

MEDIASTINAL WINDOW · representative slice 074 / 134 · band slices 65–83

Anatomy (expanded)

Four cardiac chambers, coronary grooves, mid-lobe and lingula, descending aorta.

How to read this window

Heart size, pericardium, pulmonary embolus in PA, lower-lobe nodules.

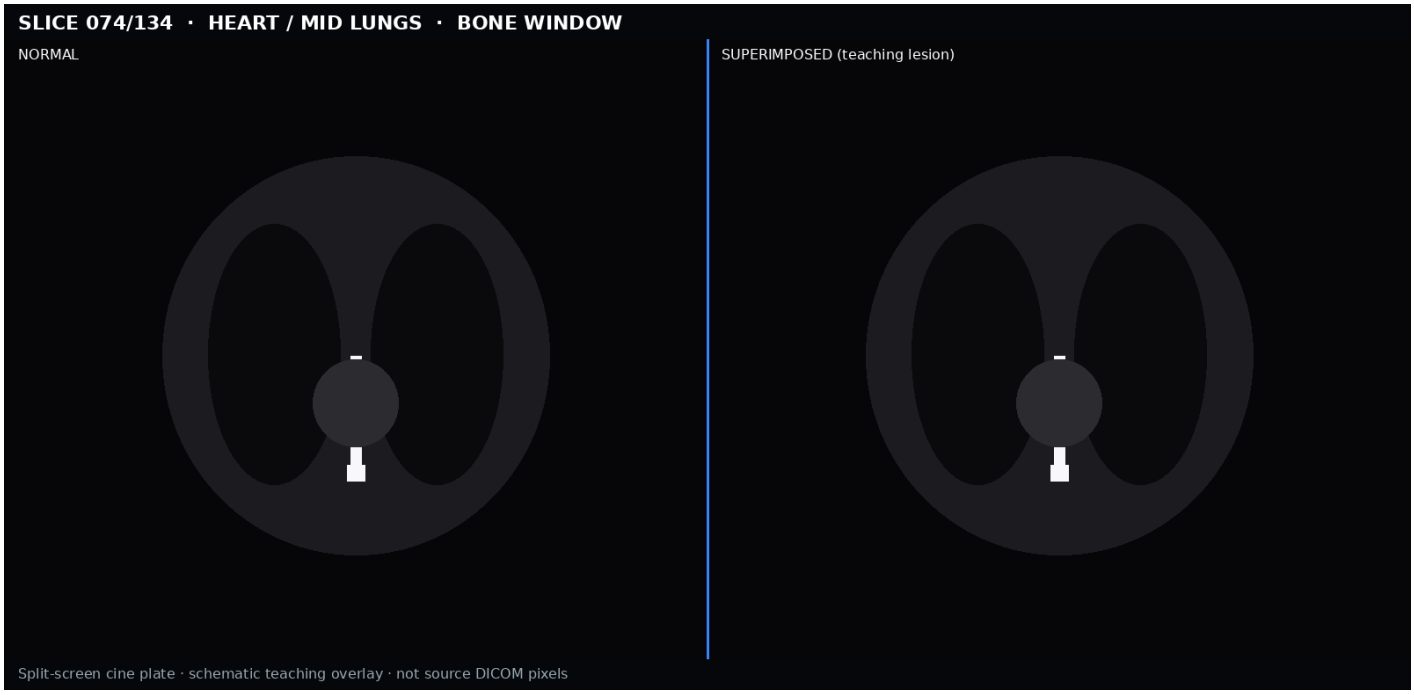

Window: WW ~350 HU · WL ~40 HU · nodes, vessels, heart, fat planes

Slow dictation (this slice)

Slice 74 of 134. Axial chest CT. NSCLC chest CT teaching series. Station HEART / MID LUNGS. Anatomy on this slice: Four cardiac chambers, coronary grooves, mid-lobe and lingula, descending aorta. How to read it: Heart size, pericardium, pulmonary embolus in PA, lower-lobe nodules. No mass mapped at this exact level. Still search lungs, mediastinum, bone, and support devices. Read lung window, then mediastinum, then bone. Split screen: LEFT normal anatomy, RIGHT same slice with the teaching lesion superimposed.

HEART / MID LUNGS

BONE WINDOW · representative slice 074 / 134 · band slices 65–83

Anatomy (expanded)

Four cardiac chambers, coronary grooves, mid-lobe and lingula, descending aorta.

How to read this window

Heart size, pericardium, pulmonary embolus in PA, lower-lobe nodules.

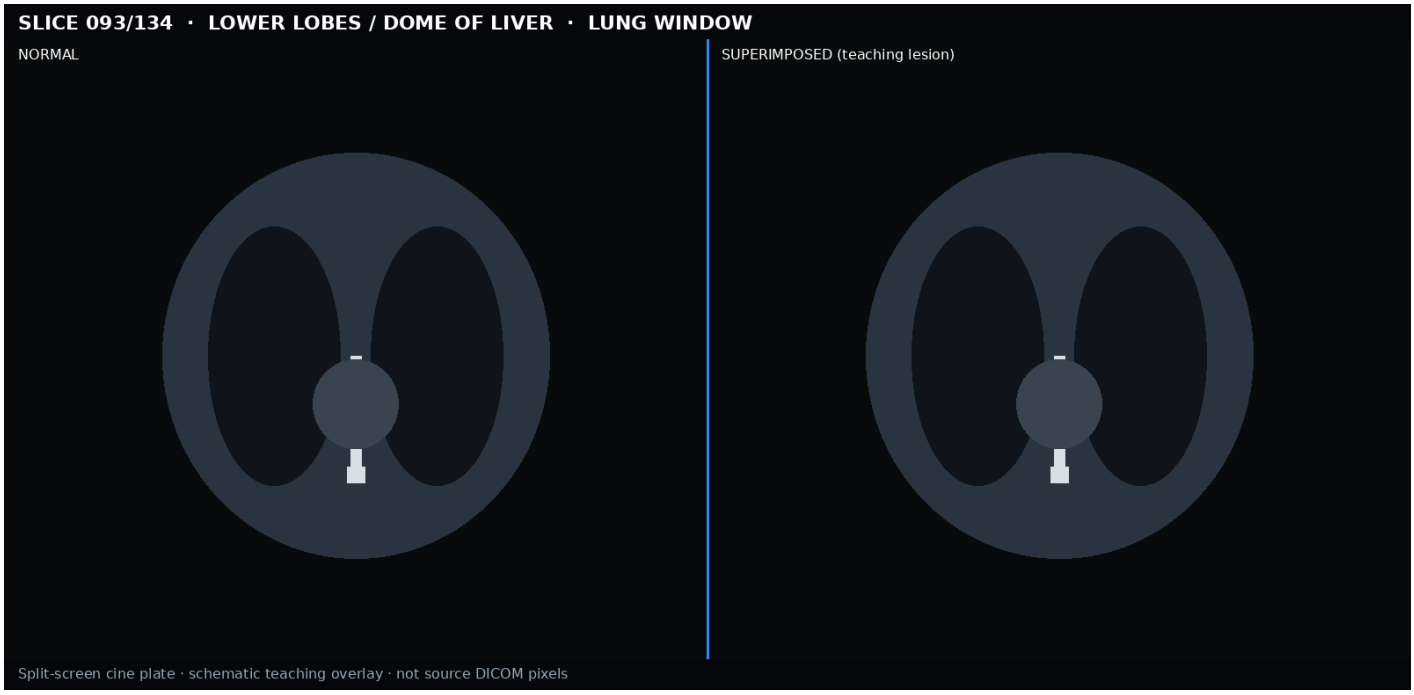

Window: WW ~2000 HU · WL ~300 HU · cortex, ribs, vertebrae, hardware

Slow dictation (this slice)

Slice 74 of 134. Axial chest CT. NSCLC chest CT teaching series. Station HEART / MID LUNGS. Anatomy on this slice: Four cardiac chambers, coronary grooves, mid-lobe and lingula, descending aorta. How to read it: Heart size, pericardium, pulmonary embolus in PA, lower-lobe nodules. No mass mapped at this exact level. Still search lungs, mediastinum, bone, and support devices. Read lung window, then mediastinum, then bone. Split screen: LEFT normal anatomy, RIGHT same slice with the teaching lesion superimposed.

LOWER LOBES / DOME OF LIVER

LUNG WINDOW · representative slice 093 / 134 · band slices 84–102

Anatomy (expanded)

Lower lobes, costophrenic sulci starting, dome of liver, IVC, esophageal hiatus.

How to read this window

Bases, adrenal on the next slices, pleural fluid, bone windows for vertebrae.

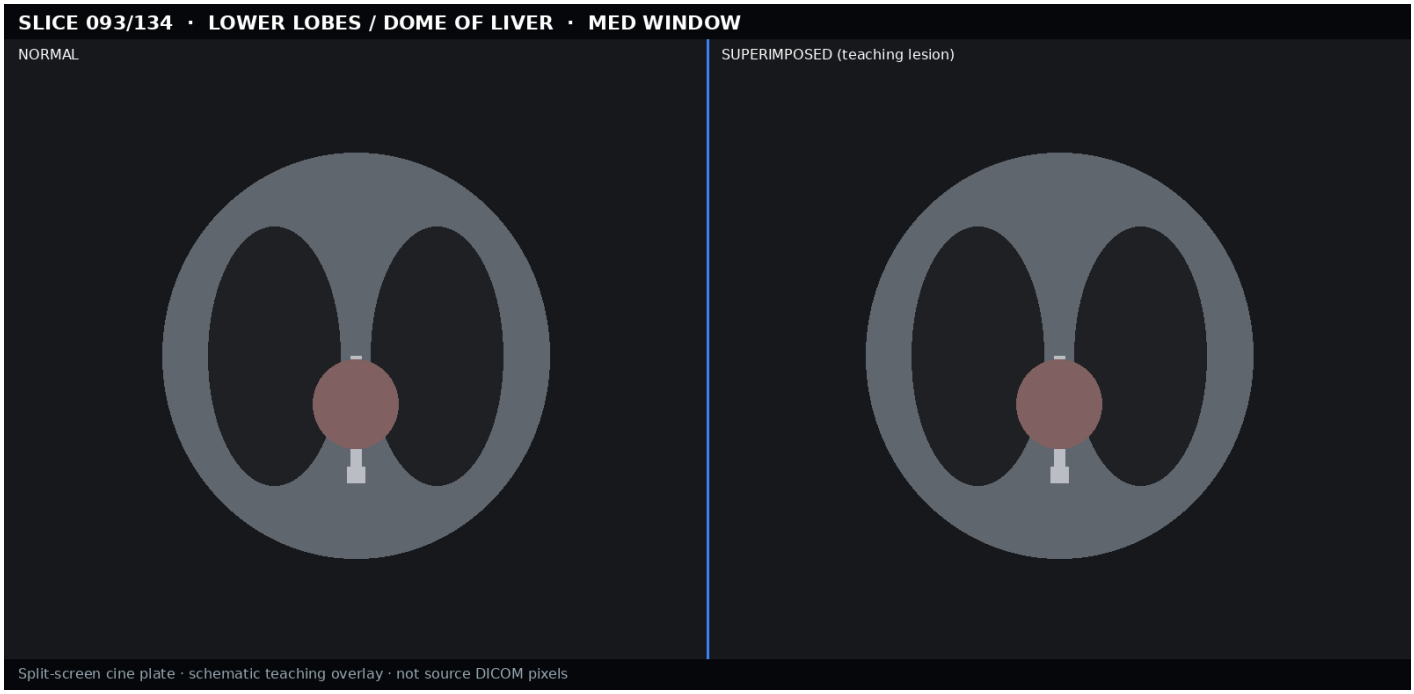

Window: WW ~1500 HU · WL ~-600 HU · parenchyma, nodules, airways

Slow dictation (this slice)

Slice 93 of 134. Axial chest CT. NSCLC chest CT teaching series. Station LOWER LOBES / DOME OF LIVER. Anatomy on this slice: Lower lobes, costophrenic sulci starting, dome of liver, IVC, esophageal hiatus. How to read it: Bases, adrenal on the next slices, pleural fluid, bone windows for vertebrae. No mass mapped at this exact level. Still search lungs, mediastinum, bone, and support devices. Read lung window, then mediastinum, then bone. Split screen: LEFT normal anatomy, RIGHT same slice with the teaching lesion superimposed.

LOWER LOBES / DOME OF LIVER

MEDIASTINAL WINDOW · representative slice 093 / 134 · band slices 84–102

Anatomy (expanded)

Lower lobes, costophrenic sulci starting, dome of liver, IVC, esophageal hiatus.

How to read this window

Bases, adrenal on the next slices, pleural fluid, bone windows for vertebrae.

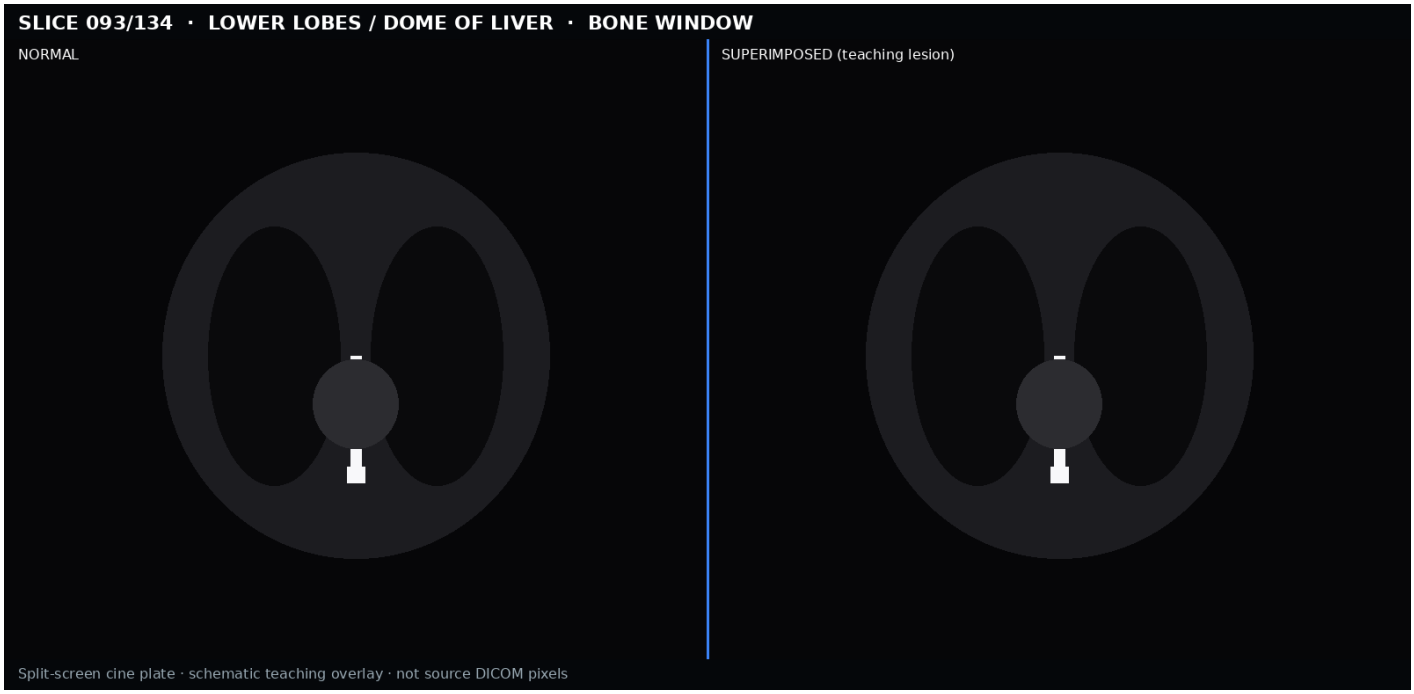

Window: WW ~350 HU · WL ~40 HU · nodes, vessels, heart, fat planes

Slow dictation (this slice)

Slice 93 of 134. Axial chest CT. NSCLC chest CT teaching series. Station LOWER LOBES / DOME OF LIVER. Anatomy on this slice: Lower lobes, costophrenic sulci starting, dome of liver, IVC, esophageal hiatus. How to read it: Bases, adrenal on the next slices, pleural fluid, bone windows for vertebrae. No mass mapped at this exact level. Still search lungs, mediastinum, bone, and support devices. Read lung window, then mediastinum, then bone. Split screen: LEFT normal anatomy, RIGHT same slice with the teaching lesion superimposed.

LOWER LOBES / DOME OF LIVER

BONE WINDOW · representative slice 093 / 134 · band slices 84–102

Anatomy (expanded)

Lower lobes, costophrenic sulci starting, dome of liver, IVC, esophageal hiatus.

How to read this window

Bases, adrenal on the next slices, pleural fluid, bone windows for vertebrae.

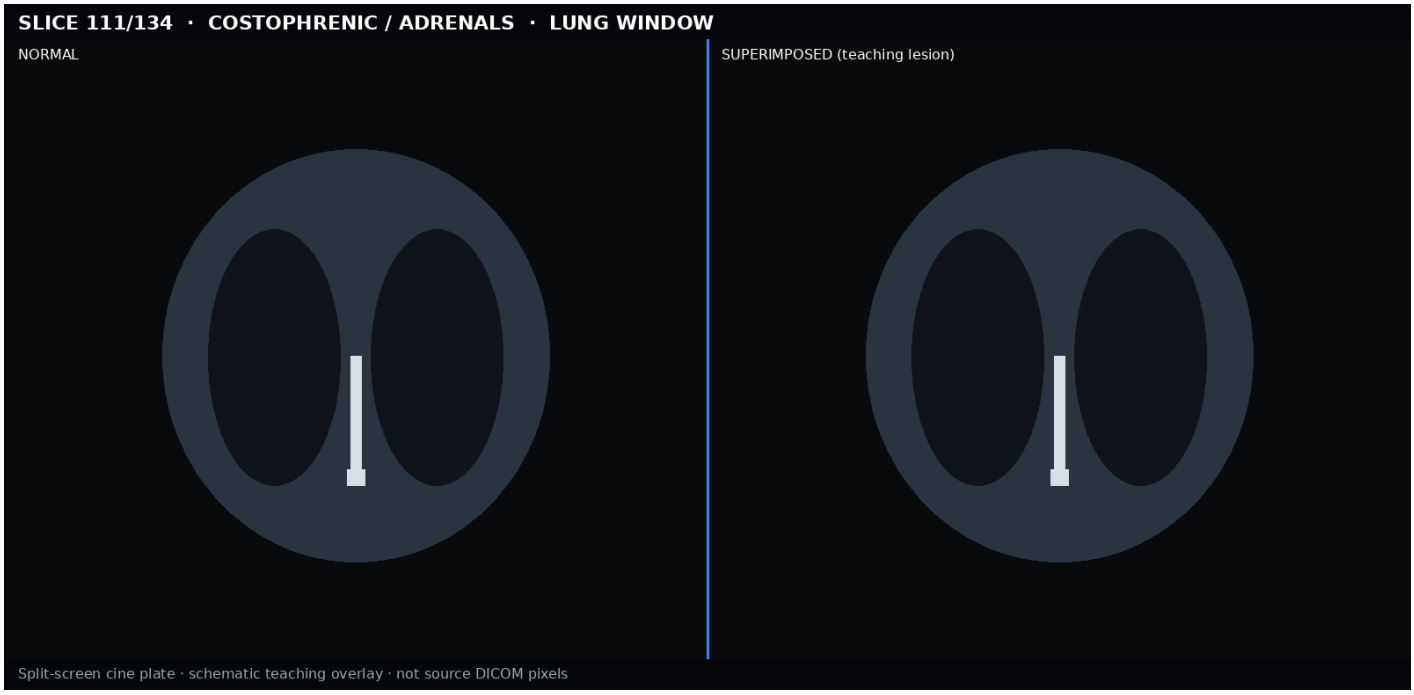

Window: WW ~2000 HU · WL ~300 HU · cortex, ribs, vertebrae, hardware

Slow dictation (this slice)

Slice 93 of 134. Axial chest CT. NSCLC chest CT teaching series. Station LOWER LOBES / DOME OF LIVER. Anatomy on this slice: Lower lobes, costophrenic sulci starting, dome of liver, IVC, esophageal hiatus. How to read it: Bases, adrenal on the next slices, pleural fluid, bone windows for vertebrae. No mass mapped at this exact level. Still search lungs, mediastinum, bone, and support devices. Read lung window, then mediastinum, then bone. Split screen: LEFT normal anatomy, RIGHT same slice with the teaching lesion superimposed.

COSTOPHRENIC / ADRENALS

LUNG WINDOW · representative slice 111 / 134 · band slices 103–120

Anatomy (expanded)

Posterior costophrenic recesses, adrenals, upper poles of kidneys, stomach bubble.

How to read this window

Adrenal mets in NSCLC staging, pleural fluid, compression fracture.

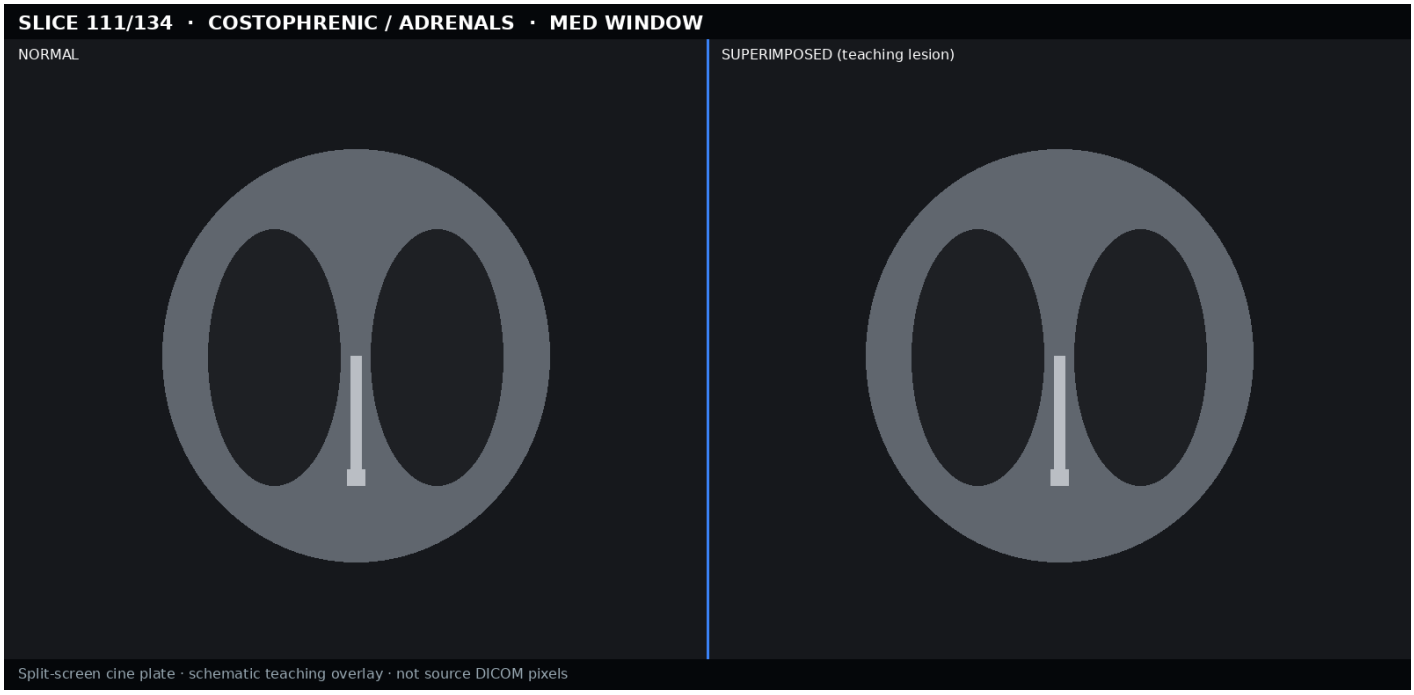

Window: WW ~1500 HU · WL ~-600 HU · parenchyma, nodules, airways

Slow dictation (this slice)

Slice 111 of 134. Axial chest CT. NSCLC chest CT teaching series. Station COSTOPHRENIC / ADRENALS. Anatomy on this slice: Posterior costophrenic recesses, adrenals, upper poles of kidneys, stomach bubble. How to read it: Adrenal mets in NSCLC staging, pleural fluid, compression fracture. No mass mapped at this exact level. Still search lungs, mediastinum, bone, and support devices. Read lung window, then mediastinum, then bone. Split screen: LEFT normal anatomy, RIGHT same slice with the teaching lesion superimposed.

COSTOPHRENIC / ADRENALS

MEDIASTINAL WINDOW · representative slice 111 / 134 · band slices 103–120

Anatomy (expanded)

Posterior costophrenic recesses, adrenals, upper poles of kidneys, stomach bubble.

How to read this window

Adrenal mets in NSCLC staging, pleural fluid, compression fracture.

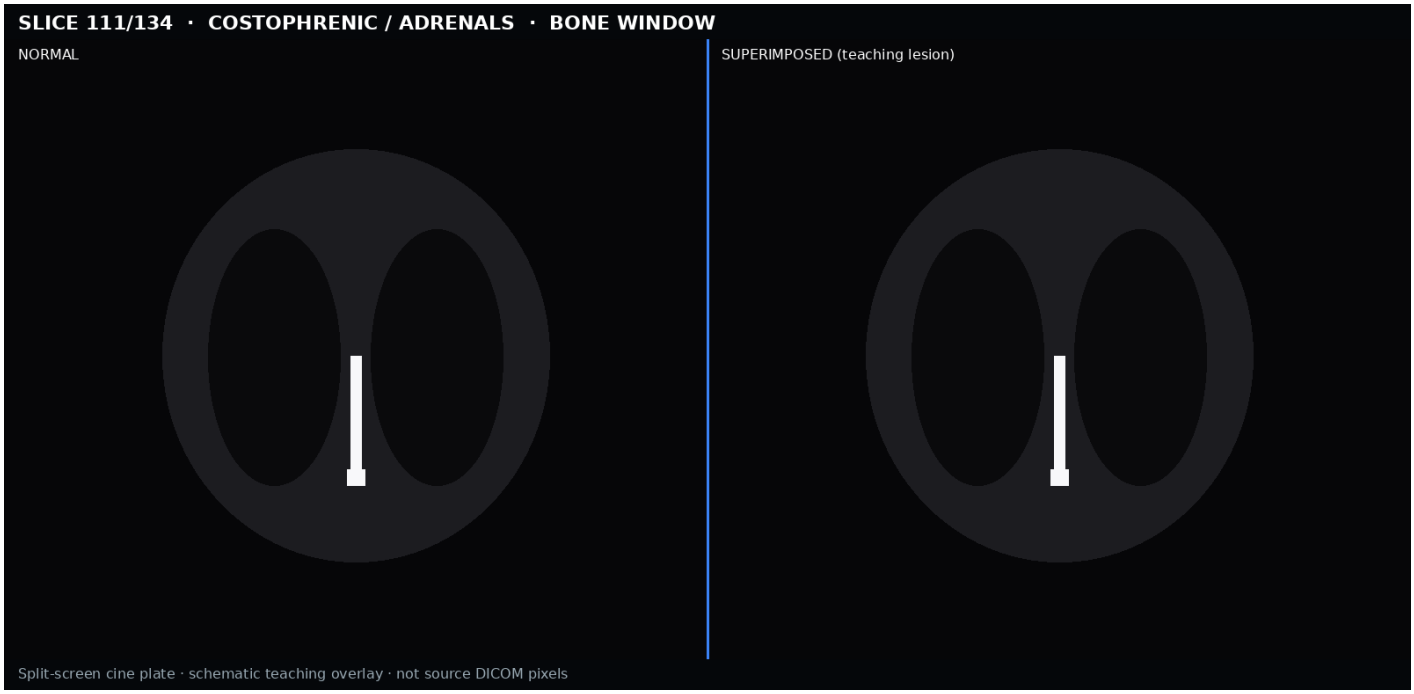

Window: WW ~350 HU · WL ~40 HU · nodes, vessels, heart, fat planes

Slow dictation (this slice)

Slice 111 of 134. Axial chest CT. NSCLC chest CT teaching series. Station COSTOPHRENIC / ADRENALS. Anatomy on this slice: Posterior costophrenic recesses, adrenals, upper poles of kidneys, stomach bubble. How to read it: Adrenal mets in NSCLC staging, pleural fluid, compression fracture. No mass mapped at this exact level. Still search lungs, mediastinum, bone, and support devices. Read lung window, then mediastinum, then bone. Split screen: LEFT normal anatomy, RIGHT same slice with the teaching lesion superimposed.

COSTOPHRENIC / ADRENALS

BONE WINDOW · representative slice 111 / 134 · band slices 103–120

Anatomy (expanded)

Posterior costophrenic recesses, adrenals, upper poles of kidneys, stomach bubble.

How to read this window

Adrenal mets in NSCLC staging, pleural fluid, compression fracture.

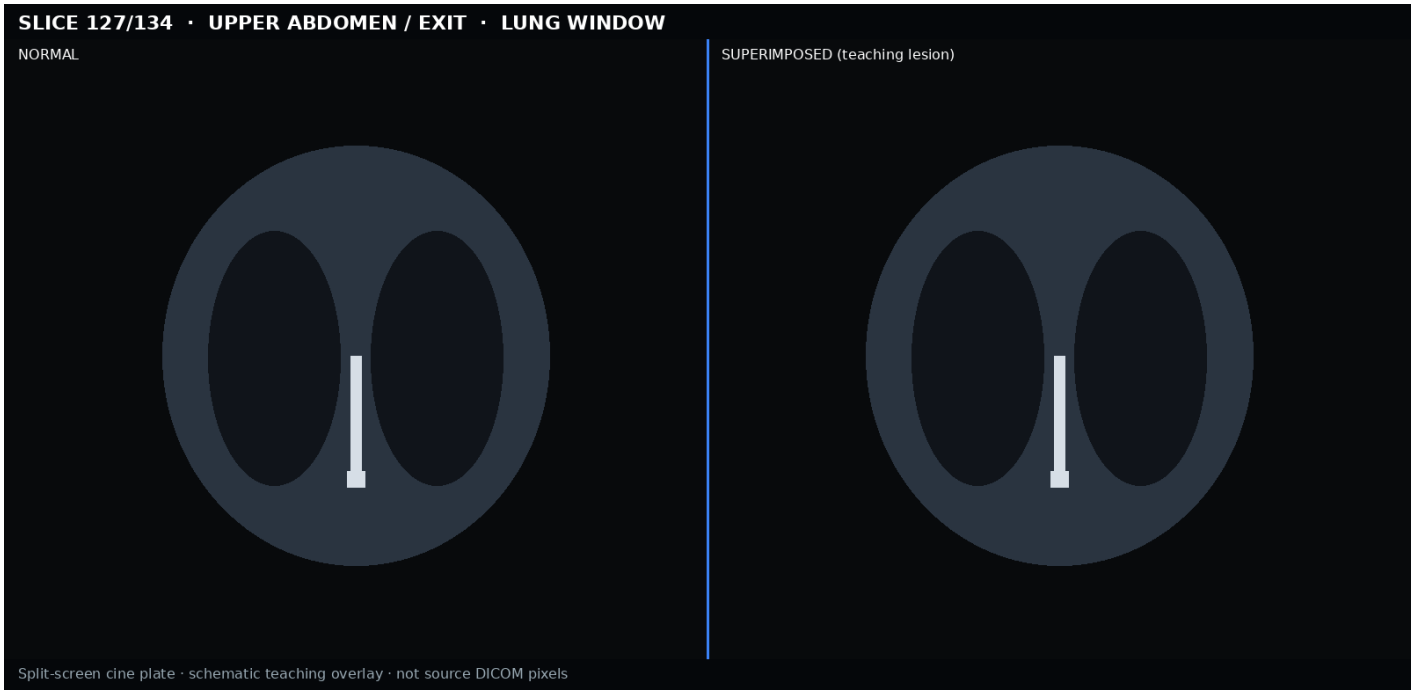

Window: WW ~2000 HU · WL ~300 HU · cortex, ribs, vertebrae, hardware

Slow dictation (this slice)

Slice 111 of 134. Axial chest CT. NSCLC chest CT teaching series. Station COSTOPHRENIC / ADRENALS. Anatomy on this slice: Posterior costophrenic recesses, adrenals, upper poles of kidneys, stomach bubble. How to read it: Adrenal mets in NSCLC staging, pleural fluid, compression fracture. No mass mapped at this exact level. Still search lungs, mediastinum, bone, and support devices. Read lung window, then mediastinum, then bone. Split screen: LEFT normal anatomy, RIGHT same slice with the teaching lesion superimposed.

UPPER ABDOMEN / EXIT

LUNG WINDOW · representative slice 127 / 134 · band slices 121–134

Anatomy (expanded)

Liver, spleen, kidneys, pancreas tail, remaining lung bases.

How to read this window

Incidental abdomen. Confirm you reviewed lung, mediastinum, bone, and tubes on the way down.

Window: WW ~1500 HU · WL ~-600 HU · parenchyma, nodules, airways

Slow dictation (this slice)

Slice 127 of 134. Axial chest CT. NSCLC chest CT teaching series. Station UPPER ABDOMEN / EXIT. Anatomy on this slice: Liver, spleen, kidneys, pancreas tail, remaining lung bases. How to read it: Incidental abdomen. Confirm you reviewed lung, mediastinum, bone, and tubes on the way down. No mass mapped at this exact level. Still search lungs, mediastinum, bone, and support devices. Read lung window, then mediastinum, then bone. Split screen: LEFT normal anatomy, RIGHT same slice with the teaching lesion superimposed.

UPPER ABDOMEN / EXIT

MEDIASTINAL WINDOW · representative slice 127 / 134 · band slices 121–134

Anatomy (expanded)

Liver, spleen, kidneys, pancreas tail, remaining lung bases.

How to read this window

Incidental abdomen. Confirm you reviewed lung, mediastinum, bone, and tubes on the way down.

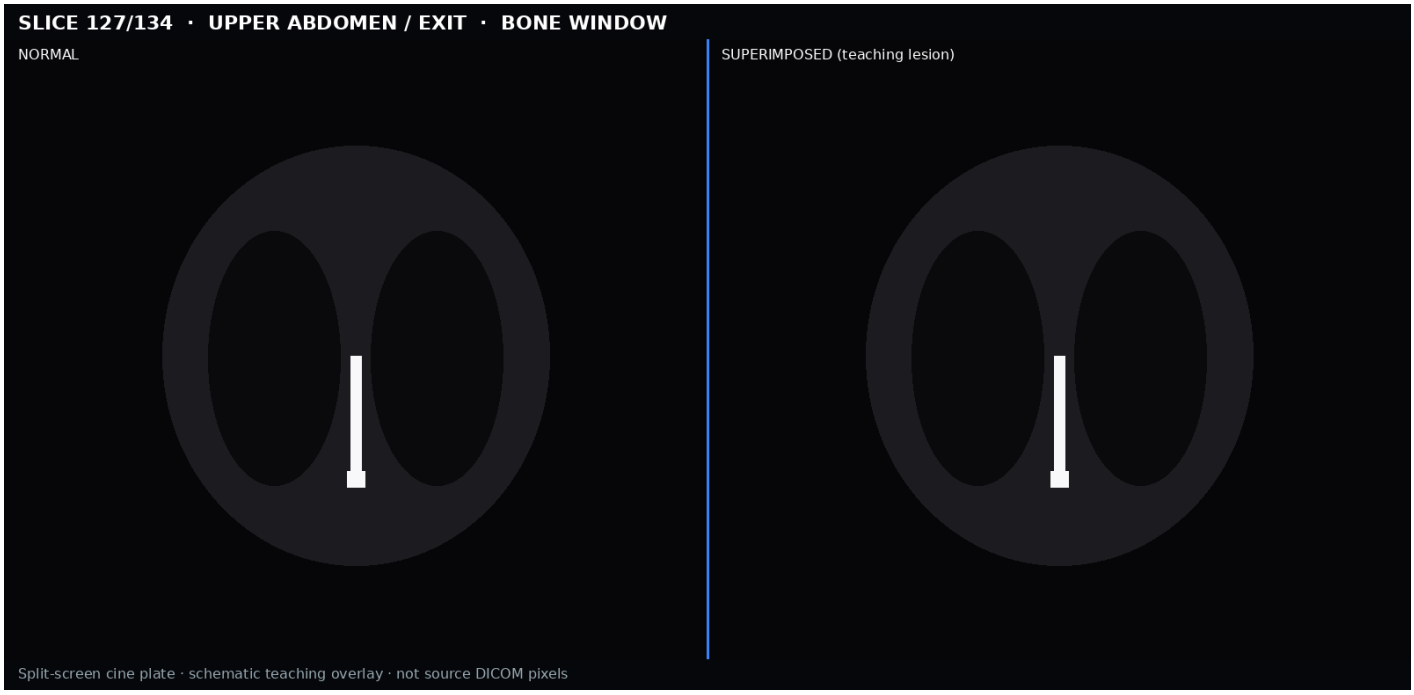

Window: WW ~350 HU · WL ~40 HU · nodes, vessels, heart, fat planes

Slow dictation (this slice)

Slice 127 of 134. Axial chest CT. NSCLC chest CT teaching series. Station UPPER ABDOMEN / EXIT. Anatomy on this slice: Liver, spleen, kidneys, pancreas tail, remaining lung bases. How to read it: Incidental abdomen. Confirm you reviewed lung, mediastinum, bone, and tubes on the way down. No mass mapped at this exact level. Still search lungs, mediastinum, bone, and support devices. Read lung window, then mediastinum, then bone. Split screen: LEFT normal anatomy, RIGHT same slice with the teaching lesion superimposed.

UPPER ABDOMEN / EXIT

BONE WINDOW · representative slice 127 / 134 · band slices 121–134

Anatomy (expanded)

Liver, spleen, kidneys, pancreas tail, remaining lung bases.

How to read this window

Incidental abdomen. Confirm you reviewed lung, mediastinum, bone, and tubes on the way down.

Window: WW ~2000 HU · WL ~300 HU · cortex, ribs, vertebrae, hardware

Slow dictation (this slice)

Slice 127 of 134. Axial chest CT. NSCLC chest CT teaching series. Station UPPER ABDOMEN / EXIT. Anatomy on this slice: Liver, spleen, kidneys, pancreas tail, remaining lung bases. How to read it: Incidental abdomen. Confirm you reviewed lung, mediastinum, bone, and tubes on the way down. No mass mapped at this exact level. Still search lungs, mediastinum, bone, and support devices. Read lung window, then mediastinum, then bone. Split screen: LEFT normal anatomy, RIGHT same slice with the teaching lesion superimposed.

3. Entire study — slow dictation per slice

These are the words the Board Studio player speaks, in order, when you dictate remaining from slice 1. Each line is one cine stop. Superimpose/split applies on slices 38–67.

Slice 001 / 134 · LUNG APICES / LOWER NECK

Slice 1 of 134. Axial chest CT. NSCLC chest CT teaching series. Station LUNG APICES / LOWER NECK. Anatomy on this slice: Lung apices, C7–T1, midline trachea, thyroid, sternocleidomastoid, extra-pleural apical fat. How to read it: Search apices for Pancoast mass, thyroid nodules, tracheal deviation, apical scarring. No mass mapped at this exact level. Still search lungs, mediastinum, bone, and support devices. Read lung window, then mediastinum, then bone. Split screen: LEFT normal anatomy, RIGHT same slice with the teaching lesion superimposed.

Slice 002 / 134 · LUNG APICES / LOWER NECK

Slice 2 of 134. Axial chest CT. NSCLC chest CT teaching series. Station LUNG APICES / LOWER NECK. Anatomy on this slice: Lung apices, C7–T1, midline trachea, thyroid, sternocleidomastoid, extra-pleural apical fat. How to read it: Search apices for Pancoast mass, thyroid nodules, tracheal deviation, apical scarring. No mass mapped at this exact level. Still search lungs, mediastinum, bone, and support devices. Read lung window, then mediastinum, then bone. Split screen: LEFT normal anatomy, RIGHT same slice with the teaching lesion superimposed.

Slice 003 / 134 · LUNG APICES / LOWER NECK

Slice 3 of 134. Axial chest CT. NSCLC chest CT teaching series. Station LUNG APICES / LOWER NECK. Anatomy on this slice: Lung apices, C7–T1, midline trachea, thyroid, sternocleidomastoid, extra-pleural apical fat. How to read it: Search apices for Pancoast mass, thyroid nodules, tracheal deviation, apical scarring. No mass mapped at this exact level. Still search lungs, mediastinum, bone, and support devices. Read lung window, then mediastinum, then bone. Split screen: LEFT normal anatomy, RIGHT same slice with the teaching lesion superimposed.

Slice 004 / 134 · LUNG APICES / LOWER NECK

Slice 4 of 134. Axial chest CT. NSCLC chest CT teaching series. Station LUNG APICES / LOWER NECK. Anatomy on this slice: Lung apices, C7–T1, midline trachea, thyroid, sternocleidomastoid, extra-pleural apical fat. How to read it: Search apices for Pancoast mass, thyroid nodules, tracheal deviation, apical scarring. No mass mapped at this exact level. Still search lungs, mediastinum, bone, and support devices. Read lung window, then mediastinum, then bone. Split screen: LEFT normal anatomy, RIGHT same slice with the teaching lesion superimposed.

Slice 005 / 134 · LUNG APICES / LOWER NECK

Slice 5 of 134. Axial chest CT. NSCLC chest CT teaching series. Station LUNG APICES / LOWER NECK. Anatomy on this slice: Lung apices, C7–T1, midline trachea, thyroid, sternocleidomastoid, extra-pleural apical fat. How to read it: Search apices for Pancoast mass, thyroid nodules, tracheal deviation, apical scarring. No mass mapped at this exact level. Still search lungs, mediastinum, bone, and support devices. Read lung window, then mediastinum, then bone. Split screen: LEFT normal anatomy, RIGHT same slice with the teaching lesion superimposed.

Slice 006 / 134 · LUNG APICES / LOWER NECK

Slice 6 of 134. Axial chest CT. NSCLC chest CT teaching series. Station LUNG APICES / LOWER NECK. Anatomy on this slice: Lung apices, C7–T1, midline trachea, thyroid, sternocleidomastoid, extra-pleural apical fat. How to read it: Search apices for Pancoast mass, thyroid nodules, tracheal deviation, apical scarring. No mass mapped at this exact level. Still search lungs, mediastinum, bone, and support devices. Read lung window, then mediastinum, then bone. Split screen: LEFT normal anatomy, RIGHT same slice with the teaching lesion superimposed.

Slice 007 / 134 · LUNG APICES / LOWER NECK

Slice 7 of 134. Axial chest CT. NSCLC chest CT teaching series. Station LUNG APICES / LOWER NECK. Anatomy on this slice: Lung apices, C7–T1, midline trachea, thyroid, sternocleidomastoid, extra-pleural apical fat. How to read it: Search apices for Pancoast mass, thyroid nodules, tracheal deviation, apical scarring. No mass mapped at this exact level. Still search lungs, mediastinum, bone, and support devices. Read lung window, then mediastinum, then bone. Split screen: LEFT normal anatomy, RIGHT same slice with the teaching lesion superimposed.

Slice 008 / 134 · THORACIC INLET

Slice 8 of 134. Axial chest CT. NSCLC chest CT teaching series. Station THORACIC INLET. Anatomy on this slice: Sternoclavicular joints, lung apices, esophagus, brachiocephalic veins, brachial-plexus fat. How to read it: Inlet mass, lymphadenopathy, clavicles, first ribs. No mass mapped at this exact level. Still search lungs, mediastinum, bone, and support devices. Read lung window, then mediastinum, then bone. Split screen: LEFT normal anatomy, RIGHT same slice with the teaching lesion superimposed.

Slice 009 / 134 · THORACIC INLET

Slice 9 of 134. Axial chest CT. NSCLC chest CT teaching series. Station THORACIC INLET. Anatomy on this slice: Sternoclavicular joints, lung apices, esophagus, brachiocephalic veins, brachial-plexus fat. How to read it: Inlet mass, lymphadenopathy, clavicles, first ribs. No mass mapped at this exact level. Still search lungs, mediastinum, bone, and support devices. Read lung window, then mediastinum, then bone. Split screen: LEFT normal anatomy, RIGHT same slice with the teaching lesion superimposed.

Slice 010 / 134 · THORACIC INLET

Slice 10 of 134. Axial chest CT. NSCLC chest CT teaching series. Station THORACIC INLET. Anatomy on this slice: Sternoclavicular joints, lung apices, esophagus, brachiocephalic veins, brachial-plexus fat. How to read it: Inlet mass, lymphadenopathy, clavicles, first ribs. No mass mapped at this exact level. Still search lungs, mediastinum, bone, and support devices. Read lung window, then mediastinum, then bone. Split screen: LEFT normal anatomy, RIGHT same slice with the teaching lesion superimposed.

Slice 011 / 134 · THORACIC INLET

Slice 11 of 134. Axial chest CT. NSCLC chest CT teaching series. Station THORACIC INLET. Anatomy on this slice: Sternoclavicular joints, lung apices, esophagus, brachiocephalic veins, brachial-plexus fat. How to read it: Inlet mass, lymphadenopathy, clavicles, first ribs. No mass mapped at this exact level. Still search lungs, mediastinum, bone, and support devices. Read lung window, then mediastinum, then bone. Split screen: LEFT normal anatomy, RIGHT same slice with the teaching lesion superimposed.

Slice 012 / 134 · THORACIC INLET

Slice 12 of 134. Axial chest CT. NSCLC chest CT teaching series. Station THORACIC INLET. Anatomy on this slice: Sternoclavicular joints, lung apices, esophagus, brachiocephalic veins, brachial-plexus fat. How to read it: Inlet mass, lymphadenopathy, clavicles, first ribs. No mass mapped at this exact level. Still search lungs, mediastinum, bone, and support devices. Read lung window, then mediastinum, then bone. Split screen: LEFT normal anatomy, RIGHT same slice with the teaching lesion superimposed.

Slice 013 / 134 · THORACIC INLET

Slice 13 of 134. Axial chest CT. NSCLC chest CT teaching series. Station THORACIC INLET. Anatomy on this slice: Sternoclavicular joints, lung apices, esophagus, brachiocephalic veins, brachial-plexus fat. How to read it: Inlet mass, lymphadenopathy, clavicles, first ribs. No mass mapped at this exact level. Still search lungs, mediastinum, bone, and support devices. Read lung window, then mediastinum, then bone. Split screen: LEFT normal anatomy, RIGHT same slice with the teaching lesion superimposed.

Slice 014 / 134 · THORACIC INLET

Slice 14 of 134. Axial chest CT. NSCLC chest CT teaching series. Station THORACIC INLET. Anatomy on this slice: Sternoclavicular joints, lung apices, esophagus, brachiocephalic veins, brachial-plexus fat. How to read it: Inlet mass, lymphadenopathy, clavicles, first ribs. No mass mapped at this exact level. Still search lungs, mediastinum, bone, and support devices. Read lung window, then mediastinum, then bone. Split screen: LEFT normal anatomy, RIGHT same slice with the teaching lesion superimposed.

Slice 015 / 134 · THORACIC INLET

Slice 15 of 134. Axial chest CT. NSCLC chest CT teaching series. Station THORACIC INLET. Anatomy on this slice: Sternoclavicular joints, lung apices, esophagus, brachiocephalic veins, brachial-plexus fat. How to read it: Inlet mass, lymphadenopathy, clavicles, first ribs. No mass mapped at this exact level. Still search lungs, mediastinum, bone, and support devices. Read lung window, then mediastinum, then bone. Split screen: LEFT normal anatomy, RIGHT same slice with the teaching lesion superimposed.

Slice 016 / 134 · THORACIC INLET

Slice 16 of 134. Axial chest CT. NSCLC chest CT teaching series. Station THORACIC INLET. Anatomy on this slice: Sternoclavicular joints, lung apices, esophagus, brachiocephalic veins, brachial-plexus fat. How to read it: Inlet mass, lymphadenopathy, clavicles, first ribs. No mass mapped at this exact level. Still search lungs, mediastinum, bone, and support devices. Read lung window, then mediastinum, then bone. Split screen: LEFT normal anatomy, RIGHT same slice with the teaching lesion superimposed.

Slice 017 / 134 · UPPER LOBES / AORTIC ARCH

Slice 17 of 134. Axial chest CT. NSCLC chest CT teaching series. Station UPPER LOBES / AORTIC ARCH. Anatomy on this slice: Aortic arch, SVC, trachea, upper lobes, prevascular fat. How to read it: Mediastinal nodes, aortic aneurysm, RUL and LUL parenchyma. No

mass mapped at this exact level. Still search lungs, mediastinum, bone, and support devices. Read lung window, then mediastinum, then bone. Split screen: LEFT normal anatomy, RIGHT same slice with the teaching lesion superimposed.

Slice 018 / 134 · UPPER LOBES / AORTIC ARCH

Slice 18 of 134. Axial chest CT. NSCLC chest CT teaching series. Station UPPER LOBES / AORTIC ARCH. Anatomy on this slice: Aortic arch, SVC, trachea, upper lobes, prevascular fat. How to read it: Mediastinal nodes, aortic aneurysm, RUL and LUL parenchyma. No mass mapped at this exact level. Still search lungs, mediastinum, bone, and support devices. Read lung window, then mediastinum, then bone. Split screen: LEFT normal anatomy, RIGHT same slice with the teaching lesion superimposed.

Slice 019 / 134 · UPPER LOBES / AORTIC ARCH

Slice 19 of 134. Axial chest CT. NSCLC chest CT teaching series. Station UPPER LOBES / AORTIC ARCH. Anatomy on this slice: Aortic arch, SVC, trachea, upper lobes, prevascular fat. How to read it: Mediastinal nodes, aortic aneurysm, RUL and LUL parenchyma. No mass mapped at this exact level. Still search lungs, mediastinum, bone, and support devices. Read lung window, then mediastinum, then bone. Split screen: LEFT normal anatomy, RIGHT same slice with the teaching lesion superimposed.

Slice 020 / 134 · UPPER LOBES / AORTIC ARCH

Slice 20 of 134. Axial chest CT. NSCLC chest CT teaching series. Station UPPER LOBES / AORTIC ARCH. Anatomy on this slice: Aortic arch, SVC, trachea, upper lobes, prevascular fat. How to read it: Mediastinal nodes, aortic aneurysm, RUL and LUL parenchyma. No mass mapped at this exact level. Still search lungs, mediastinum, bone, and support devices. Read lung window, then mediastinum, then bone. Split screen: LEFT normal anatomy, RIGHT same slice with the teaching lesion superimposed.

Slice 021 / 134 · UPPER LOBES / AORTIC ARCH

Slice 21 of 134. Axial chest CT. NSCLC chest CT teaching series. Station UPPER LOBES / AORTIC ARCH. Anatomy on this slice: Aortic arch, SVC, trachea, upper lobes, prevascular fat. How to read it: Mediastinal nodes, aortic aneurysm, RUL and LUL parenchyma. No mass mapped at this exact level. Still search lungs, mediastinum, bone, and support devices. Read lung window, then mediastinum, then bone. Split screen: LEFT normal anatomy, RIGHT same slice with the teaching lesion superimposed.

Slice 022 / 134 · UPPER LOBES / AORTIC ARCH

Slice 22 of 134. Axial chest CT. NSCLC chest CT teaching series. Station UPPER LOBES / AORTIC ARCH. Anatomy on this slice: Aortic arch, SVC, trachea, upper lobes, prevascular fat. How to read it: Mediastinal nodes, aortic aneurysm, RUL and LUL parenchyma. No mass mapped at this exact level. Still search lungs, mediastinum, bone, and support devices. Read lung window, then mediastinum, then bone. Split screen: LEFT normal anatomy, RIGHT same slice with the teaching lesion superimposed.

Slice 023 / 134 · UPPER LOBES / AORTIC ARCH

Slice 23 of 134. Axial chest CT. NSCLC chest CT teaching series. Station UPPER LOBES / AORTIC ARCH. Anatomy on this slice: Aortic arch, SVC, trachea, upper lobes, prevascular fat. How to read it: Mediastinal nodes, aortic aneurysm, RUL and LUL parenchyma. No mass mapped at this exact level. Still search lungs, mediastinum, bone, and support devices. Read lung window, then mediastinum, then bone. Split screen: LEFT normal anatomy, RIGHT same slice with the teaching lesion superimposed.

Slice 024 / 134 · UPPER LOBES / AORTIC ARCH

Slice 24 of 134. Axial chest CT. NSCLC chest CT teaching series. Station UPPER LOBES / AORTIC ARCH. Anatomy on this slice: Aortic arch, SVC, trachea, upper lobes, prevascular fat. How to read it: Mediastinal nodes, aortic aneurysm, RUL and LUL parenchyma. No mass mapped at this exact level. Still search lungs, mediastinum, bone, and support devices. Read lung window, then mediastinum, then bone. Split screen: LEFT normal anatomy, RIGHT same slice with the teaching lesion superimposed.

Slice 025 / 134 · UPPER LOBES / AORTIC ARCH

Slice 25 of 134. Axial chest CT. NSCLC chest CT teaching series. Station UPPER LOBES / AORTIC ARCH. Anatomy on this slice: Aortic arch, SVC, trachea, upper lobes, prevascular fat. How to read it: Mediastinal nodes, aortic aneurysm, RUL and LUL parenchyma. No mass mapped at this exact level. Still search lungs, mediastinum, bone, and support devices. Read lung window, then mediastinum, then bone. Split screen: LEFT normal anatomy, RIGHT same slice with the teaching lesion superimposed.

Slice 026 / 134 · UPPER LOBES / AORTIC ARCH

Slice 26 of 134. Axial chest CT. NSCLC chest CT teaching series. Station UPPER LOBES / AORTIC ARCH. Anatomy on this slice: Aortic arch, SVC, trachea, upper lobes, prevascular fat. How to read it: Mediastinal nodes, aortic aneurysm, RUL and LUL parenchyma. No mass mapped at this exact level. Still search lungs, mediastinum, bone, and support devices. Read lung window, then mediastinum, then bone. Split screen: LEFT normal anatomy, RIGHT same slice with the teaching lesion superimposed.

Slice 027 / 134 · UPPER LOBES / AORTIC ARCH

Slice 27 of 134. Axial chest CT. NSCLC chest CT teaching series. Station UPPER LOBES / AORTIC ARCH. Anatomy on this slice: Aortic arch, SVC, trachea, upper lobes, prevascular fat. How to read it: Mediastinal nodes, aortic aneurysm, RUL and LUL parenchyma. No mass mapped at this exact level. Still search lungs, mediastinum, bone, and support devices. Read lung window, then mediastinum, then bone. Split screen: LEFT normal anatomy, RIGHT same slice with the teaching lesion superimposed.

Slice 028 / 134 · UPPER LOBES / AORTIC ARCH

Slice 28 of 134. Axial chest CT. NSCLC chest CT teaching series. Station UPPER LOBES / AORTIC ARCH. Anatomy on this slice: Aortic arch, SVC, trachea, upper lobes, prevascular fat. How to read it: Mediastinal nodes, aortic aneurysm, RUL and LUL parenchyma. No mass mapped at this exact level. Still search lungs, mediastinum, bone, and support devices. Read lung window, then mediastinum, then bone. Split screen: LEFT normal anatomy, RIGHT same slice with the teaching lesion superimposed.

Slice 029 / 134 · UPPER LOBES / AORTIC ARCH

Slice 29 of 134. Axial chest CT. NSCLC chest CT teaching series. Station UPPER LOBES / AORTIC ARCH. Anatomy on this slice: Aortic arch, SVC, trachea, upper lobes, prevascular fat. How to read it: Mediastinal nodes, aortic aneurysm, RUL and LUL parenchyma. No mass mapped at this exact level. Still search lungs, mediastinum, bone, and support devices. Read lung window, then mediastinum, then bone. Split screen: LEFT normal anatomy, RIGHT same slice with the teaching lesion superimposed.

Slice 030 / 134 · UPPER LOBES / AORTIC ARCH

Slice 30 of 134. Axial chest CT. NSCLC chest CT teaching series. Station UPPER LOBES / AORTIC ARCH. Anatomy on this slice: Aortic arch, SVC, trachea, upper lobes, prevascular fat. How to read it: Mediastinal nodes, aortic aneurysm, RUL and LUL parenchyma. No mass mapped at this exact level. Still search lungs, mediastinum, bone, and support devices. Read lung window, then mediastinum, then bone. Split screen: LEFT normal anatomy, RIGHT same slice with the teaching lesion superimposed.

Slice 031 / 134 · AORTOPULMONARY WINDOW

Slice 31 of 134. Axial chest CT. NSCLC chest CT teaching series. Station AORTOPULMONARY WINDOW. Anatomy on this slice: AP window, main PA, carina approaching, upper-lobe bronchi. How to read it: AP-window nodes. RUL mass typical of NSCLC teaching cases sits near this band. No mass mapped at this exact level. Still search lungs, mediastinum, bone, and support devices. Read lung window, then mediastinum, then bone. Split screen: LEFT normal anatomy, RIGHT same slice with the teaching lesion superimposed.

Slice 032 / 134 · AORTOPULMONARY WINDOW

Slice 32 of 134. Axial chest CT. NSCLC chest CT teaching series. Station AORTOPULMONARY WINDOW. Anatomy on this slice: AP window, main PA, carina approaching, upper-lobe bronchi. How to read it: AP-window nodes. RUL mass typical of NSCLC teaching cases sits near this band. No mass mapped at this exact level. Still search lungs, mediastinum, bone, and support devices. Read lung window, then mediastinum, then bone. Split screen: LEFT normal anatomy, RIGHT same slice with the teaching lesion superimposed.

Slice 033 / 134 · AORTOPULMONARY WINDOW

Slice 33 of 134. Axial chest CT. NSCLC chest CT teaching series. Station AORTOPULMONARY WINDOW. Anatomy on this slice: AP window, main PA, carina approaching, upper-lobe bronchi. How to read it: AP-window nodes. RUL mass typical of NSCLC teaching cases sits near this band. No mass mapped at this exact level. Still search lungs, mediastinum, bone, and support devices. Read lung window, then mediastinum, then bone. Split screen: LEFT normal anatomy, RIGHT same slice with the teaching lesion superimposed.

Slice 034 / 134 · AORTOPULMONARY WINDOW

Slice 34 of 134. Axial chest CT. NSCLC chest CT teaching series. Station AORTOPULMONARY WINDOW. Anatomy on this slice: AP window, main PA, carina approaching, upper-lobe bronchi. How to read it: AP-window nodes. RUL mass typical of NSCLC teaching cases sits near this band. No mass mapped at this exact level. Still search lungs, mediastinum, bone, and support devices. Read lung window, then mediastinum, then bone. Split screen: LEFT normal anatomy, RIGHT same slice with the teaching lesion superimposed.

Slice 035 / 134 · AORTOPULMONARY WINDOW

Slice 35 of 134. Axial chest CT. NSCLC chest CT teaching series. Station AORTOPULMONARY WINDOW. Anatomy on this slice: AP window, main PA, carina approaching, upper-lobe bronchi. How to read it: AP-window nodes. RUL mass typical of NSCLC teaching cases sits near this band. No mass mapped at this exact level. Still search lungs, mediastinum, bone, and support devices. Read lung window, then mediastinum, then bone. Split screen: LEFT normal anatomy, RIGHT same slice with the teaching lesion superimposed.

Slice 036 / 134 · AORTOPULMONARY WINDOW

Slice 36 of 134. Axial chest CT. NSCLC chest CT teaching series. Station AORTOPULMONARY WINDOW. Anatomy on this slice: AP window, main PA, carina approaching, upper-lobe bronchi. How to read it: AP-window nodes. RUL mass typical of NSCLC teaching cases

sits near this band. No mass mapped at this exact level. Still search lungs, mediastinum, bone, and support devices. Read lung window, then mediastinum, then bone. Split screen: LEFT normal anatomy, RIGHT same slice with the teaching lesion superimposed.

Slice 037 / 134 · AORTOPULMONARY WINDOW

Slice 37 of 134. Axial chest CT. NSCLC chest CT teaching series. Station AORTOPULMONARY WINDOW. Anatomy on this slice: AP window, main PA, carina approaching, upper-lobe bronchi. How to read it: AP-window nodes. RUL mass typical of NSCLC teaching cases sits near this band. No mass mapped at this exact level. Still search lungs, mediastinum, bone, and support devices. Read lung window, then mediastinum, then bone. Split screen: LEFT normal anatomy, RIGHT same slice with the teaching lesion superimposed.

Slice 038 / 134 · AORTOPULMONARY WINDOW

Slice 38 of 134. Axial chest CT. NSCLC chest CT teaching series. Station AORTOPULMONARY WINDOW. Anatomy on this slice: AP window, main PA, carina approaching, upper-lobe bronchi. How to read it: AP-window nodes. RUL mass typical of NSCLC teaching cases sits near this band. No mass mapped at this exact level. Still search lungs, mediastinum, bone, and support devices. Read lung window, then mediastinum, then bone. Split screen: LEFT normal anatomy, RIGHT same slice with the teaching lesion superimposed.

Slice 039 / 134 · AORTOPULMONARY WINDOW · SUPERIMPOSE ON

Slice 39 of 134. Axial chest CT. NSCLC chest CT teaching series. Station AORTOPULMONARY WINDOW. Anatomy on this slice: AP window, main PA, carina approaching, upper-lobe bronchi. How to read it: AP-window nodes. RUL mass typical of NSCLC teaching cases sits near this band. Teaching lesion: spiculated right-upper-lobe mass at this level, NSCLC-Radiomics LUNG1 pattern. Window lung then mediastinum. Check chest wall, fissure, and nodes. Read lung window, then mediastinum, then bone. Split screen: LEFT normal anatomy, RIGHT same slice with the teaching lesion superimposed.

Slice 040 / 134 · AORTOPULMONARY WINDOW · SUPERIMPOSE ON

Slice 40 of 134. Axial chest CT. NSCLC chest CT teaching series. Station AORTOPULMONARY WINDOW. Anatomy on this slice: AP window, main PA, carina approaching, upper-lobe bronchi. How to read it: AP-window nodes. RUL mass typical of NSCLC teaching cases sits near this band. Teaching lesion: spiculated right-upper-lobe mass at this level, NSCLC-Radiomics LUNG1 pattern. Window lung then mediastinum. Check chest wall, fissure, and nodes. Read lung window, then mediastinum, then bone. Split screen: LEFT normal anatomy, RIGHT same slice with the teaching lesion superimposed.

Teaching lesion: spiculated right-upper-lobe mass at this level, NSCLC-Radiomics LUNG1 pattern. Window lung then mediastinum. Check chest wall, fissure, and nodes. Read lung window, then mediastinum, then bone. Split screen: LEFT normal anatomy, RIGHT same slice with the teaching lesion superimposed.

Slice 056 / 134 · HILA / CARINA · SUPERIMPOSE ON

Slice 56 of 134. Axial chest CT. NSCLC chest CT teaching series. Station HILA / CARINA. Anatomy on this slice: Carina, main bronchi, hilar vessels, azygos, upper heart border. How to read it: Hilar nodes, endobronchial lesion. Measure any RUL spiculated mass on lung then mediastinum. Teaching lesion: spiculated right-upper-lobe mass at this level, NSCLC-Radiomics LUNG1 pattern. Window lung then mediastinum. Check chest wall, fissure, and nodes. Read lung window, then mediastinum, then bone. Split screen: LEFT normal anatomy, RIGHT same slice with the teaching lesion superimposed.

Slice 057 / 134 · HILA / CARINA · SUPERIMPOSE ON

Slice 57 of 134. Axial chest CT. NSCLC chest CT teaching series. Station HILA / CARINA. Anatomy on this slice: Carina, main bronchi, hilar vessels, azygos, upper heart border. How to read it: Hilar nodes, endobronchial lesion. Measure any RUL spiculated mass on lung then mediastinum. Teaching lesion: spiculated right-upper-lobe mass at this level, NSCLC-Radiomics LUNG1 pattern. Window lung then mediastinum. Check chest wall, fissure, and nodes. Read lung window, then mediastinum, then bone. Split screen: LEFT normal anatomy, RIGHT same slice with the teaching lesion superimposed.

Slice 058 / 134 · HILA / CARINA · SUPERIMPOSE ON

Slice 58 of 134. Axial chest CT. NSCLC chest CT teaching series. Station HILA / CARINA. Anatomy on this slice: Carina, main bronchi, hilar vessels, azygos, upper heart border. How to read it: Hilar nodes, endobronchial lesion. Measure any RUL spiculated mass on lung then mediastinum. Teaching lesion: spiculated right-upper-lobe mass at this level, NSCLC-Radiomics LUNG1 pattern. Window lung then mediastinum. Check chest wall, fissure, and nodes. Read lung window, then mediastinum, then bone. Split screen: LEFT normal anatomy, RIGHT same slice with the teaching lesion superimposed.

Slice 059 / 134 · HILA / CARINA · SUPERIMPOSE ON

Slice 59 of 134. Axial chest CT. NSCLC chest CT teaching series. Station HILA / CARINA. Anatomy on this slice: Carina, main bronchi, hilar vessels, azygos, upper heart border. How to read it: Hilar nodes, endobronchial lesion. Measure any RUL spiculated mass on lung then mediastinum. Teaching lesion: spiculated right-upper-lobe mass at this level, NSCLC-Radiomics LUNG1 pattern. Window lung then mediastinum. Check chest wall, fissure, and nodes. Read lung window, then mediastinum, then bone. Split screen: LEFT normal anatomy, RIGHT same slice with the teaching lesion superimposed.

Slice 060 / 134 · HILA / CARINA · SUPERIMPOSE ON

Slice 60 of 134. Axial chest CT. NSCLC chest CT teaching series. Station HILA / CARINA. Anatomy on this slice: Carina, main bronchi, hilar vessels, azygos, upper heart border. How to read it: Hilar nodes, endobronchial lesion. Measure any RUL spiculated mass on lung then mediastinum. Teaching lesion: spiculated right-upper-lobe mass at this level, NSCLC-Radiomics LUNG1 pattern. Window lung then mediastinum. Check chest wall, fissure, and nodes. Read lung window, then mediastinum, then bone. Split screen: LEFT normal anatomy, RIGHT same slice with the teaching lesion superimposed.

Slice 061 / 134 · HILA / CARINA · SUPERIMPOSE ON

Slice 61 of 134. Axial chest CT. NSCLC chest CT teaching series. Station HILA / CARINA. Anatomy on this slice: Carina, main bronchi, hilar vessels, azygos, upper heart border. How to read it: Hilar nodes, endobronchial lesion. Measure any RUL spiculated mass on lung then mediastinum. Teaching lesion: spiculated right-upper-lobe mass at this level, NSCLC-Radiomics LUNG1 pattern. Window lung then mediastinum. Check chest wall, fissure, and nodes. Read lung window, then mediastinum, then bone. Split screen: LEFT normal anatomy, RIGHT same slice with the teaching lesion superimposed.

Slice 062 / 134 · HILA / CARINA · SUPERIMPOSE ON

Slice 62 of 134. Axial chest CT. NSCLC chest CT teaching series. Station HILA / CARINA. Anatomy on this slice: Carina, main bronchi, hilar vessels, azygos, upper heart border. How to read it: Hilar nodes, endobronchial lesion. Measure any RUL spiculated mass on lung then mediastinum. Teaching lesion: spiculated right-upper-lobe mass at this level, NSCLC-Radiomics LUNG1 pattern. Window lung then mediastinum. Check chest wall, fissure, and nodes. Read lung window, then mediastinum, then bone. Split screen: LEFT normal anatomy, RIGHT same slice with the teaching lesion superimposed.

Slice 063 / 134 · HILA / CARINA · SUPERIMPOSE ON

Slice 63 of 134. Axial chest CT. NSCLC chest CT teaching series. Station HILA / CARINA. Anatomy on this slice: Carina, main bronchi, hilar vessels, azygos, upper heart border. How to read it: Hilar nodes, endobronchial lesion. Measure any RUL spiculated mass on lung then mediastinum. Teaching lesion: spiculated right-upper-lobe mass at this level, NSCLC-Radiomics LUNG1 pattern. Window lung then mediastinum. Check chest wall, fissure, and nodes. Read lung window, then mediastinum, then bone. Split screen: LEFT normal anatomy, RIGHT same slice with the teaching lesion superimposed.

Slice 064 / 134 · HILA / CARINA · SUPERIMPOSE ON

Slice 64 of 134. Axial chest CT. NSCLC chest CT teaching series. Station HILA / CARINA. Anatomy on this slice: Carina, main bronchi, hilar vessels, azygos, upper heart border. How to read it: Hilar nodes, endobronchial lesion. Measure any RUL spiculated mass on lung then mediastinum. Teaching lesion: spiculated right-upper-lobe mass at this level, NSCLC-Radiomics LUNG1 pattern. Window lung then mediastinum. Check chest wall, fissure, and nodes. Read lung window, then mediastinum, then bone. Split screen: LEFT normal anatomy, RIGHT same slice with the teaching lesion superimposed.

Slice 065 / 134 · HEART / MID LUNGS · SUPERIMPOSE ON

Slice 65 of 134. Axial chest CT. NSCLC chest CT teaching series. Station HEART / MID LUNGS. Anatomy on this slice: Four cardiac chambers, coronary grooves, mid-lobe and lingula, descending aorta. How to read it: Heart size, pericardium, pulmonary embolus in PA, lower-lobe nodules. Teaching lesion: spiculated right-upper-lobe mass at this level, NSCLC-Radiomics LUNG1 pattern. Window lung then mediastinum. Check chest wall, fissure, and nodes. Read lung window, then mediastinum, then bone. Split screen: LEFT normal anatomy, RIGHT same slice with the teaching lesion superimposed.

Slice 066 / 134 · HEART / MID LUNGS · SUPERIMPOSE ON

Slice 66 of 134. Axial chest CT. NSCLC chest CT teaching series. Station HEART / MID LUNGS. Anatomy on this slice: Four cardiac chambers, coronary grooves, mid-lobe and lingula, descending aorta. How to read it: Heart size, pericardium, pulmonary embolus in PA, lower-lobe nodules. Teaching lesion: spiculated right-upper-lobe mass at this level, NSCLC-Radiomics LUNG1 pattern. Window lung then mediastinum. Check chest wall, fissure, and nodes. Read lung window, then mediastinum, then bone. Split screen: LEFT normal anatomy, RIGHT same slice with the teaching lesion superimposed.

Slice 067 / 134 · HEART / MID LUNGS · SUPERIMPOSE ON

Slice 67 of 134. Axial chest CT. NSCLC chest CT teaching series. Station HEART / MID LUNGS. Anatomy on this slice: Four cardiac chambers, coronary grooves, mid-lobe and lingula, descending aorta. How to read it: Heart size, pericardium, pulmonary embolus in PA, lower-lobe nodules. Teaching lesion: spiculated right-upper-lobe mass at this level, NSCLC-Radiomics LUNG1 pattern. Window lung then mediastinum. Check chest wall, fissure, and nodes. Read lung window, then mediastinum, then bone. Split screen: LEFT normal anatomy, RIGHT same slice with the teaching lesion superimposed.

Slice 068 / 134 · HEART / MID LUNGS

Slice 68 of 134. Axial chest CT. NSCLC chest CT teaching series. Station HEART / MID LUNGS. Anatomy on this slice: Four cardiac chambers, coronary grooves, mid-lobe and lingula, descending aorta. How to read it: Heart size, pericardium, pulmonary embolus in PA, lower-lobe nodules. No mass mapped at this exact level. Still search lungs, mediastinum, bone, and support devices. Read lung window, then mediastinum, then bone. Split screen: LEFT normal anatomy, RIGHT same slice with the teaching lesion superimposed.

Slice 069 / 134 · HEART / MID LUNGS

Slice 69 of 134. Axial chest CT. NSCLC chest CT teaching series. Station HEART / MID LUNGS. Anatomy on this slice: Four cardiac chambers, coronary grooves, mid-lobe and lingula, descending aorta. How to read it: Heart size, pericardium, pulmonary embolus in PA, lower-lobe nodules. No mass mapped at this exact level. Still search lungs, mediastinum, bone, and support devices. Read lung window, then mediastinum, then bone. Split screen: LEFT normal anatomy, RIGHT same slice with the teaching lesion superimposed.

Slice 070 / 134 · HEART / MID LUNGS

Slice 70 of 134. Axial chest CT. NSCLC chest CT teaching series. Station HEART / MID LUNGS. Anatomy on this slice: Four cardiac chambers, coronary grooves, mid-lobe and lingula, descending aorta. How to read it: Heart size, pericardium, pulmonary embolus in PA, lower-lobe nodules. No mass mapped at this exact level. Still search lungs, mediastinum, bone, and support devices. Read lung window, then mediastinum, then bone. Split screen: LEFT normal anatomy, RIGHT same slice with the teaching lesion superimposed.

Slice 071 / 134 · HEART / MID LUNGS

Slice 71 of 134. Axial chest CT. NSCLC chest CT teaching series. Station HEART / MID LUNGS. Anatomy on this slice: Four cardiac chambers, coronary grooves, mid-lobe and lingula, descending aorta. How to read it: Heart size, pericardium, pulmonary embolus in PA, lower-lobe nodules. No mass mapped at this exact level. Still search lungs, mediastinum, bone, and support devices. Read lung window, then mediastinum, then bone. Split screen: LEFT normal anatomy, RIGHT same slice with the teaching lesion superimposed.

Slice 072 / 134 · HEART / MID LUNGS

Slice 72 of 134. Axial chest CT. NSCLC chest CT teaching series. Station HEART / MID LUNGS. Anatomy on this slice: Four cardiac chambers, coronary grooves, mid-lobe and lingula, descending aorta. How to read it: Heart size, pericardium, pulmonary embolus in PA, lower-lobe nodules. No mass mapped at this exact level. Still search lungs, mediastinum, bone, and support devices. Read lung window, then mediastinum, then bone. Split screen: LEFT normal anatomy, RIGHT same slice with the teaching lesion superimposed.

Slice 073 / 134 · HEART / MID LUNGS

Slice 73 of 134. Axial chest CT. NSCLC chest CT teaching series. Station HEART / MID LUNGS. Anatomy on this slice: Four cardiac chambers, coronary grooves, mid-lobe and lingula, descending aorta. How to read it: Heart size, pericardium, pulmonary embolus in PA, lower-lobe nodules. No mass mapped at this exact level. Still search lungs, mediastinum, bone, and support devices. Read lung window, then mediastinum, then bone. Split screen: LEFT normal anatomy, RIGHT same slice with the teaching lesion superimposed.

Slice 074 / 134 · HEART / MID LUNGS

Slice 74 of 134. Axial chest CT. NSCLC chest CT teaching series. Station HEART / MID LUNGS. Anatomy on this slice: Four cardiac chambers, coronary grooves, mid-lobe and lingula, descending aorta. How to read it: Heart size, pericardium, pulmonary embolus in PA, lower-lobe nodules. No mass mapped at this exact level. Still search lungs, mediastinum, bone, and support devices. Read lung window, then mediastinum, then bone. Split screen: LEFT normal anatomy, RIGHT same slice with the teaching lesion superimposed.

Slice 075 / 134 · HEART / MID LUNGS

Slice 75 of 134. Axial chest CT. NSCLC chest CT teaching series. Station HEART / MID LUNGS. Anatomy on this slice: Four cardiac chambers, coronary grooves, mid-lobe and lingula, descending aorta. How to read it: Heart size, pericardium, pulmonary embolus in PA, lower-lobe nodules. No mass mapped at this exact level. Still search lungs, mediastinum, bone, and support devices. Read lung window, then mediastinum, then bone. Split screen: LEFT normal anatomy, RIGHT same slice with the teaching lesion superimposed.

Slice 076 / 134 · HEART / MID LUNGS

Slice 76 of 134. Axial chest CT. NSCLC chest CT teaching series. Station HEART / MID LUNGS. Anatomy on this slice: Four cardiac chambers, coronary grooves, mid-lobe and lingula, descending aorta. How to read it: Heart size, pericardium, pulmonary embolus in PA, lower-lobe nodules. No mass mapped at this exact level. Still search lungs, mediastinum, bone, and support devices. Read lung window, then mediastinum, then bone. Split screen: LEFT normal anatomy, RIGHT same slice with the teaching lesion superimposed.

Slice 077 / 134 · HEART / MID LUNGS

Slice 77 of 134. Axial chest CT. NSCLC chest CT teaching series. Station HEART / MID LUNGS. Anatomy on this slice: Four cardiac chambers, coronary grooves, mid-lobe and lingula, descending aorta. How to read it: Heart size, pericardium, pulmonary embolus in PA, lower-lobe nodules. No mass mapped at this exact level. Still search lungs, mediastinum, bone, and support devices. Read lung window, then mediastinum, then bone. Split screen: LEFT normal anatomy, RIGHT same slice with the teaching lesion superimposed.

Slice 078 / 134 · HEART / MID LUNGS

Slice 78 of 134. Axial chest CT. NSCLC chest CT teaching series. Station HEART / MID LUNGS. Anatomy on this slice: Four cardiac chambers, coronary grooves, mid-lobe and lingula, descending aorta. How to read it: Heart size, pericardium, pulmonary embolus in PA,

lower-lobe nodules. No mass mapped at this exact level. Still search lungs, mediastinum, bone, and support devices. Read lung window, then mediastinum, then bone. Split screen: LEFT normal anatomy, RIGHT same slice with the teaching lesion superimposed.

Slice 079 / 134 · HEART / MID LUNGS

Slice 79 of 134. Axial chest CT. NSCLC chest CT teaching series. Station HEART / MID LUNGS. Anatomy on this slice: Four cardiac chambers, coronary grooves, mid-lobe and lingula, descending aorta. How to read it: Heart size, pericardium, pulmonary embolus in PA, lower-lobe nodules. No mass mapped at this exact level. Still search lungs, mediastinum, bone, and support devices. Read lung window, then mediastinum, then bone. Split screen: LEFT normal anatomy, RIGHT same slice with the teaching lesion superimposed.

Slice 080 / 134 · HEART / MID LUNGS

Slice 80 of 134. Axial chest CT. NSCLC chest CT teaching series. Station HEART / MID LUNGS. Anatomy on this slice: Four cardiac chambers, coronary grooves, mid-lobe and lingula, descending aorta. How to read it: Heart size, pericardium, pulmonary embolus in PA, lower-lobe nodules. No mass mapped at this exact level. Still search lungs, mediastinum, bone, and support devices. Read lung window, then mediastinum, then bone. Split screen: LEFT normal anatomy, RIGHT same slice with the teaching lesion superimposed.

Slice 081 / 134 · HEART / MID LUNGS

Slice 81 of 134. Axial chest CT. NSCLC chest CT teaching series. Station HEART / MID LUNGS. Anatomy on this slice: Four cardiac chambers, coronary grooves, mid-lobe and lingula, descending aorta. How to read it: Heart size, pericardium, pulmonary embolus in PA, lower-lobe nodules. No mass mapped at this exact level. Still search lungs, mediastinum, bone, and support devices. Read lung window, then mediastinum, then bone. Split screen: LEFT normal anatomy, RIGHT same slice with the teaching lesion superimposed.

Slice 082 / 134 · HEART / MID LUNGS

Slice 82 of 134. Axial chest CT. NSCLC chest CT teaching series. Station HEART / MID LUNGS. Anatomy on this slice: Four cardiac chambers, coronary grooves, mid-lobe and lingula, descending aorta. How to read it: Heart size, pericardium, pulmonary embolus in PA, lower-lobe nodules. No mass mapped at this exact level. Still search lungs, mediastinum, bone, and support devices. Read lung window, then mediastinum, then bone. Split screen: LEFT normal anatomy, RIGHT same slice with the teaching lesion superimposed.

Slice 083 / 134 · HEART / MID LUNGS

Slice 83 of 134. Axial chest CT. NSCLC chest CT teaching series. Station HEART / MID LUNGS. Anatomy on this slice: Four cardiac chambers, coronary grooves, mid-lobe and lingula, descending aorta. How to read it: Heart size, pericardium, pulmonary embolus in PA, lower-lobe nodules. No mass mapped at this exact level. Still search lungs, mediastinum, bone, and support devices. Read lung window, then mediastinum, then bone. Split screen: LEFT normal anatomy, RIGHT same slice with the teaching lesion superimposed.

Slice 084 / 134 · LOWER LOBES / DOME OF LIVER

Slice 84 of 134. Axial chest CT. NSCLC chest CT teaching series. Station LOWER LOBES / DOME OF LIVER. Anatomy on this slice: Lower lobes, costophrenic sulci starting, dome of liver, IVC, esophageal hiatus. How to read it: Bases, adrenal on the next slices, pleural fluid, bone windows for vertebrae. No mass mapped at this exact level. Still search lungs, mediastinum, bone, and support devices. Read lung window, then mediastinum, then bone. Split screen: LEFT normal anatomy, RIGHT same slice with the teaching lesion superimposed.

Slice 085 / 134 · LOWER LOBES / DOME OF LIVER

Slice 85 of 134. Axial chest CT. NSCLC chest CT teaching series. Station LOWER LOBES / DOME OF LIVER. Anatomy on this slice: Lower lobes, costophrenic sulci starting, dome of liver, IVC, esophageal hiatus. How to read it: Bases, adrenal on the next slices, pleural fluid, bone windows for vertebrae. No mass mapped at this exact level. Still search lungs, mediastinum, bone, and support devices. Read lung window, then mediastinum, then bone. Split screen: LEFT normal anatomy, RIGHT same slice with the teaching lesion superimposed.

Slice 086 / 134 · LOWER LOBES / DOME OF LIVER

Slice 86 of 134. Axial chest CT. NSCLC chest CT teaching series. Station LOWER LOBES / DOME OF LIVER. Anatomy on this slice: Lower lobes, costophrenic sulci starting, dome of liver, IVC, esophageal hiatus. How to read it: Bases, adrenal on the next slices, pleural fluid, bone windows for vertebrae. No mass mapped at this exact level. Still search lungs, mediastinum, bone, and support devices. Read lung window, then mediastinum, then bone. Split screen: LEFT normal anatomy, RIGHT same slice with the teaching lesion superimposed.

Slice 087 / 134 · LOWER LOBES / DOME OF LIVER

Slice 87 of 134. Axial chest CT. NSCLC chest CT teaching series. Station LOWER LOBES / DOME OF LIVER. Anatomy on this slice: Lower lobes, costophrenic sulci starting, dome of liver, IVC, esophageal hiatus. How to read it: Bases, adrenal on the next slices, pleural fluid, bone windows for vertebrae. No mass mapped at this exact level. Still search lungs, mediastinum, bone, and support devices. Read lung window, then mediastinum, then bone. Slice 097 / 134 · LOWER LOBES / DOME OF LIVER

Slice 97 of 134. Axial chest CT. NSCLC chest CT teaching series. Station LOWER LOBES / DOME OF LIVER. Anatomy on this slice: Lower lobes, costophrenic sulci starting, dome of liver, IVC, esophageal hiatus. How to read it: Bases, adrenal on the next slices, pleural fluid,

bone windows for vertebrae. No mass mapped at this exact level. Still search lungs, mediastinum, bone, and support devices. Read lung window, then mediastinum, then bone. Split screen: LEFT normal anatomy, RIGHT same slice with the teaching lesion superimposed.

Slice 098 / 134 · LOWER LOBES / DOME OF LIVER

Slice 98 of 134. Axial chest CT. NSCLC chest CT teaching series. Station LOWER LOBES / DOME OF LIVER. Anatomy on this slice: Lower lobes, costophrenic sulci starting, dome of liver, IVC, esophageal hiatus. How to read it: Bases, adrenal on the next slices, pleural fluid, bone windows for vertebrae. No mass mapped at this exact level. Still search lungs, mediastinum, bone, and support devices. Read lung window, then mediastinum, then bone. Split screen: LEFT normal anatomy, RIGHT same slice with the teaching lesion superimposed.

Slice 099 / 134 · LOWER LOBES / DOME OF LIVER

Slice 99 of 134. Axial chest CT. NSCLC chest CT teaching series. Station LOWER LOBES / DOME OF LIVER. Anatomy on this slice: Lower lobes, costophrenic sulci starting, dome of liver, IVC, esophageal hiatus. How to read it: Bases, adrenal on the next slices, pleural fluid, bone windows for vertebrae. No mass mapped at this exact level. Still search lungs, mediastinum, bone, and support devices. Read lung window, then mediastinum, then bone. Split screen: LEFT normal anatomy, RIGHT same slice with the teaching lesion superimposed.

Slice 100 / 134 · LOWER LOBES / DOME OF LIVER

Slice 100 of 134. Axial chest CT. NSCLC chest CT teaching series. Station LOWER LOBES / DOME OF LIVER. Anatomy on this slice: Lower lobes, costophrenic sulci starting, dome of liver, IVC, esophageal hiatus. How to read it: Bases, adrenal on the next slices, pleural fluid, bone windows for vertebrae. No mass mapped at this exact level. Still search lungs, mediastinum, bone, and support devices. Read lung window, then mediastinum, then bone. Split screen: LEFT normal anatomy, RIGHT same slice with the teaching lesion superimposed.

Slice 101 / 134 · LOWER LOBES / DOME OF LIVER

Slice 101 of 134. Axial chest CT. NSCLC chest CT teaching series. Station LOWER LOBES / DOME OF LIVER. Anatomy on this slice: Lower lobes, costophrenic sulci starting, dome of liver, IVC, esophageal hiatus. How to read it: Bases, adrenal on the next slices, pleural fluid, bone windows for vertebrae. No mass mapped at this exact level. Still search lungs, mediastinum, bone, and support devices. Read lung window, then mediastinum, then bone. Split screen: LEFT normal anatomy, RIGHT same slice with the teaching lesion superimposed.

Slice 102 / 134 · LOWER LOBES / DOME OF LIVER

Slice 102 of 134. Axial chest CT. NSCLC chest CT teaching series. Station LOWER LOBES / DOME OF LIVER. Anatomy on this slice: Lower lobes, costophrenic sulci starting, dome of liver, IVC, esophageal hiatus. How to read it: Bases, adrenal on the next slices, pleural fluid, bone windows for vertebrae. No mass mapped at this exact level. Still search lungs, mediastinum, bone, and support devices. Read lung window, then mediastinum, then bone. Split screen: LEFT normal anatomy, RIGHT same slice with the teaching lesion superimposed.

Slice 103 / 134 · COSTOPHRENIC / ADRENALS

Slice 103 of 134. Axial chest CT. NSCLC chest CT teaching series. Station COSTOPHRENIC / ADRENALS. Anatomy on this slice: Posterior costophrenic recesses, adrenals, upper poles of kidneys, stomach bubble. How to read it: Adrenal mets in NSCLC staging, pleural fluid, compression fracture. No mass mapped at this exact level. Still search lungs, mediastinum, bone, and support devices. Read lung window, then mediastinum, then bone. Split screen: LEFT normal anatomy, RIGHT same slice with the teaching lesion superimposed.

Slice 104 / 134 · COSTOPHRENIC / ADRENALS

Slice 104 of 134. Axial chest CT. NSCLC chest CT teaching series. Station COSTOPHRENIC / ADRENALS. Anatomy on this slice: Posterior costophrenic recesses, adrenals, upper poles of kidneys, stomach bubble. How to read it: Adrenal mets in NSCLC staging, pleural fluid, compression fracture. No mass mapped at this exact level. Still search lungs, mediastinum, bone, and support devices. Read lung window, then mediastinum, then bone. Split screen: LEFT normal anatomy, RIGHT same slice with the teaching lesion superimposed.

Slice 105 / 134 · COSTOPHRENIC / ADRENALS

Slice 105 of 134. Axial chest CT. NSCLC chest CT teaching series. Station COSTOPHRENIC / ADRENALS. Anatomy on this slice: Posterior costophrenic recesses, adrenals, upper poles of kidneys, stomach bubble. How to read it: Adrenal mets in NSCLC staging, pleural fluid, compression fracture. No mass mapped at this exact level. Still search lungs, mediastinum, bone, and support devices. Read lung window, then mediastinum, then bone. Split screen: LEFT normal anatomy, RIGHT same slice with the teaching lesion superimposed.

Slice 106 / 134 · COSTOPHRENIC / ADRENALS

Slice 106 of 134. Axial chest CT. NSCLC chest CT teaching series. Station COSTOPHRENIC / ADRENALS. Anatomy on this slice: Posterior costophrenic recesses, adrenals, upper poles of kidneys, stomach bubble. How to read it: Adrenal mets in NSCLC staging, pleural fluid, compression fracture. No mass mapped at this exact level. Still search lungs, mediastinum, bone, and support devices. Read lung window, then mediastinum, then bone. Split screen: LEFT normal anatomy, RIGHT same slice with the teaching lesion superimposed.

Slice 107 / 134 · COSTOPHRENIC / ADRENALS

Slice 107 of 134. Axial chest CT. NSCLC chest CT teaching series. Station COSTOPHRENIC / ADRENALS. Anatomy on this slice: Posterior costophrenic recesses, adrenals, upper poles of kidneys, stomach bubble. How to read it: Adrenal mets in NSCLC staging, pleural fluid, compression fracture. No mass mapped at this exact level. Still search lungs, mediastinum, bone, and support devices. Read lung window, then mediastinum, then bone. Split screen: LEFT normal anatomy, RIGHT same slice with the teaching lesion superimposed.

Slice 108 / 134 · COSTOPHRENIC / ADRENALS

Slice 108 of 134. Axial chest CT. NSCLC chest CT teaching series. Station COSTOPHRENIC / ADRENALS. Anatomy on this slice: Posterior costophrenic recesses, adrenals, upper poles of kidneys, stomach bubble. How to read it: Adrenal mets in NSCLC staging, pleural fluid, compression fracture. No mass mapped at this exact level. Still search lungs, mediastinum, bone, and support devices. Read lung window, then mediastinum, then bone. Split screen: LEFT normal anatomy, RIGHT same slice with the teaching lesion superimposed.

Slice 109 / 134 · COSTOPHRENIC / ADRENALS

Slice 109 of 134. Axial chest CT. NSCLC chest CT teaching series. Station COSTOPHRENIC / ADRENALS. Anatomy on this slice: Posterior costophrenic recesses, adrenals, upper poles of kidneys, stomach bubble. How to read it: Adrenal mets in NSCLC staging, pleural fluid, compression fracture. No mass mapped at this exact level. Still search lungs, mediastinum, bone, and support devices. Read lung window, then mediastinum, then bone. Split screen: LEFT normal anatomy, RIGHT same slice with the teaching lesion superimposed.

Slice 110 / 134 · COSTOPHRENIC / ADRENALS

Slice 110 of 134. Axial chest CT. NSCLC chest CT teaching series. Station COSTOPHRENIC / ADRENALS. Anatomy on this slice: Posterior costophrenic recesses, adrenals, upper poles of kidneys, stomach bubble. How to read it: Adrenal mets in NSCLC staging, pleural fluid, compression fracture. No mass mapped at this exact level. Still search lungs, mediastinum, bone, and support devices. Read lung window, then mediastinum, then bone. Split screen: LEFT normal anatomy, RIGHT same slice with the teaching lesion superimposed.

Slice 111 / 134 · COSTOPHRENIC / ADRENALS

Slice 111 of 134. Axial chest CT. NSCLC chest CT teaching series. Station COSTOPHRENIC / ADRENALS. Anatomy on this slice: Posterior costophrenic recesses, adrenals, upper poles of kidneys, stomach bubble. How to read it: Adrenal mets in NSCLC staging, pleural fluid, compression fracture. No mass mapped at this exact level. Still search lungs, mediastinum, bone, and support devices. Read lung window, then mediastinum, then bone. Split screen: LEFT normal anatomy, RIGHT same slice with the teaching lesion superimposed.

Slice 112 / 134 · COSTOPHRENIC / ADRENALS

Slice 112 of 134. Axial chest CT. NSCLC chest CT teaching series. Station COSTOPHRENIC / ADRENALS. Anatomy on this slice: Posterior costophrenic recesses, adrenals, upper poles of kidneys, stomach bubble. How to read it: Adrenal mets in NSCLC staging, pleural fluid, compression fracture. No mass mapped at this exact level. Still search lungs, mediastinum, bone, and support devices. Read lung window, then mediastinum, then bone. Split screen: LEFT normal anatomy, RIGHT same slice with the teaching lesion superimposed.

Slice 113 / 134 · COSTOPHRENIC / ADRENALS

Slice 113 of 134. Axial chest CT. NSCLC chest CT teaching series. Station COSTOPHRENIC / ADRENALS. Anatomy on this slice: Posterior costophrenic recesses, adrenals, upper poles of kidneys, stomach bubble. How to read it: Adrenal mets in NSCLC staging, pleural fluid, compression fracture. No mass mapped at this exact level. Still search lungs, mediastinum, bone, and support devices. Read lung window, then mediastinum, then bone. Split screen: LEFT normal anatomy, RIGHT same slice with the teaching lesion superimposed.

Slice 114 / 134 · COSTOPHRENIC / ADRENALS

Slice 114 of 134. Axial chest CT. NSCLC chest CT teaching series. Station COSTOPHRENIC / ADRENALS. Anatomy on this slice: Posterior costophrenic recesses, adrenals, upper poles of kidneys, stomach bubble. How to read it: Adrenal mets in NSCLC staging, pleural fluid, compression fracture. No mass mapped at this exact level. Still search lungs, mediastinum, bone, and support devices. Read lung window, then mediastinum, then bone. Split screen: LEFT normal anatomy, RIGHT same slice with the teaching lesion superimposed.

Slice 115 / 134 · COSTOPHRENIC / ADRENALS

Slice 115 of 134. Axial chest CT. NSCLC chest CT teaching series. Station COSTOPHRENIC / ADRENALS. Anatomy on this slice: Posterior costophrenic recesses, adrenals, upper poles of kidneys, stomach bubble. How to read it: Adrenal mets in NSCLC staging, pleural fluid, compression fracture. No mass mapped at this exact level. Still search lungs, mediastinum, bone, and support devices. Read lung window, then mediastinum, then bone. Split screen: LEFT normal anatomy, RIGHT same slice with the teaching lesion superimposed.

Slice 116 / 134 · COSTOPHRENIC / ADRENALS

Slice 116 of 134. Axial chest CT. NSCLC chest CT teaching series. Station COSTOPHRENIC / ADRENALS. Anatomy on this slice: Posterior costophrenic recesses, adrenals, upper poles of kidneys, stomach bubble. How to read it: Adrenal mets in NSCLC staging, pleural fluid,

compression fracture. No mass mapped at this exact level. Still search lungs, mediastinum, bone, and support devices. Read lung window, then mediastinum, then bone. Split screen: LEFT normal anatomy, RIGHT same slice with the teaching lesion superimposed.

Slice 117 / 134 · COSTOPHRENIC / ADRENALS

Slice 117 of 134. Axial chest CT. NSCLC chest CT teaching series. Station COSTOPHRENIC / ADRENALS. Anatomy on this slice: Posterior costophrenic recesses, adrenals, upper poles of kidneys, stomach bubble. How to read it: Adrenal mets in NSCLC staging, pleural fluid, compression fracture. No mass mapped at this exact level. Still search lungs, mediastinum, bone, and support devices. Read lung window, then mediastinum, then bone. Split screen: LEFT normal anatomy, RIGHT same slice with the teaching lesion superimposed.

Slice 118 / 134 · COSTOPHRENIC / ADRENALS

Slice 118 of 134. Axial chest CT. NSCLC chest CT teaching series. Station COSTOPHRENIC / ADRENALS. Anatomy on this slice: Posterior costophrenic recesses, adrenals, upper poles of kidneys, stomach bubble. How to read it: Adrenal mets in NSCLC staging, pleural fluid, compression fracture. No mass mapped at this exact level. Still search lungs, mediastinum, bone, and support devices. Read lung window, then mediastinum, then bone. Split screen: LEFT normal anatomy, RIGHT same slice with the teaching lesion superimposed.

Slice 119 / 134 · COSTOPHRENIC / ADRENALS

Slice 119 of 134. Axial chest CT. NSCLC chest CT teaching series. Station COSTOPHRENIC / ADRENALS. Anatomy on this slice: Posterior costophrenic recesses, adrenals, upper poles of kidneys, stomach bubble. How to read it: Adrenal mets in NSCLC staging, pleural fluid, compression fracture. No mass mapped at this exact level. Still search lungs, mediastinum, bone, and support devices. Read lung window, then mediastinum, then bone. Split screen: LEFT normal anatomy, RIGHT same slice with the teaching lesion superimposed.

Slice 120 / 134 · COSTOPHRENIC / ADRENALS

Slice 120 of 134. Axial chest CT. NSCLC chest CT teaching series. Station COSTOPHRENIC / ADRENALS. Anatomy on this slice: Posterior costophrenic recesses, adrenals, upper poles of kidneys, stomach bubble. How to read it: Adrenal mets in NSCLC staging, pleural fluid, compression fracture. No mass mapped at this exact level. Still search lungs, mediastinum, bone, and support devices. Read lung window, then mediastinum, then bone. Split screen: LEFT normal anatomy, RIGHT same slice with the teaching lesion superimposed.

Slice 121 / 134 · UPPER ABDOMEN / EXIT

Slice 121 of 134. Axial chest CT. NSCLC chest CT teaching series. Station UPPER ABDOMEN / EXIT. Anatomy on this slice: Liver, spleen, kidneys, pancreas tail, remaining lung bases. How to read it: Incidental abdomen. Confirm you reviewed lung, mediastinum, bone, and tubes on the way down. No mass mapped at this exact level. Still search lungs, mediastinum, bone, and support devices. Read lung window, then mediastinum, then bone. Split screen: LEFT normal anatomy, RIGHT same slice with the teaching lesion superimposed.

Slice 122 / 134 · UPPER ABDOMEN / EXIT

Slice 122 of 134. Axial chest CT. NSCLC chest CT teaching series. Station UPPER ABDOMEN / EXIT. Anatomy on this slice: Liver, spleen, kidneys, pancreas tail, remaining lung bases. How to read it: Incidental abdomen. Confirm you reviewed lung, mediastinum, bone, and tubes on the way down. No mass mapped at this exact level. Still search lungs, mediastinum, bone, and support devices. Read lung window, then mediastinum, then bone. Split screen: LEFT normal anatomy, RIGHT same slice with the teaching lesion superimposed.

Slice 123 / 134 · UPPER ABDOMEN / EXIT

Slice 123 of 134. Axial chest CT. NSCLC chest CT teaching series. Station UPPER ABDOMEN / EXIT. Anatomy on this slice: Liver, spleen, kidneys, pancreas tail, remaining lung bases. How to read it: Incidental abdomen. Confirm you reviewed lung, mediastinum, bone, and tubes on the way down. No mass mapped at this exact level. Still search lungs, mediastinum, bone, and support devices. Read lung window, then mediastinum, then bone. Split screen: LEFT normal anatomy, RIGHT same slice with the teaching lesion superimposed.

Slice 124 / 134 · UPPER ABDOMEN / EXIT

Slice 124 of 134. Axial chest CT. NSCLC chest CT teaching series. Station UPPER ABDOMEN / EXIT. Anatomy on this slice: Liver, spleen, kidneys, pancreas tail, remaining lung bases. How to read it: Incidental abdomen. Confirm you reviewed lung, mediastinum, bone, and tubes on the way down. No mass mapped at this exact level. Still search lungs, mediastinum, bone, and support devices. Read lung window, then mediastinum, then bone. Split screen: LEFT normal anatomy, RIGHT same slice with the teaching lesion superimposed.

Slice 125 / 134 · UPPER ABDOMEN / EXIT

Slice 125 of 134. Axial chest CT. NSCLC chest CT teaching series. Station UPPER ABDOMEN / EXIT. Anatomy on this slice: Liver, spleen, kidneys, pancreas tail, remaining lung bases. How to read it: Incidental abdomen. Confirm you reviewed lung, mediastinum, bone, and tubes on the way down. No mass mapped at this exact level. Still search lungs, mediastinum, bone, and support devices. Read lung window, then mediastinum, then bone. Split screen: LEFT normal anatomy, RIGHT same slice with the teaching lesion superimposed.

Slice 126 / 134 · UPPER ABDOMEN / EXIT

Slice 126 of 134. Axial chest CT. NSCLC chest CT teaching series. Station UPPER ABDOMEN / EXIT. Anatomy on this slice: Liver, spleen, kidneys, pancreas tail, remaining lung bases. How to read it: Incidental abdomen. Confirm you reviewed lung, mediastinum, bone, and tubes on the way down. No mass mapped at this exact level. Still search lungs, mediastinum, bone, and support devices. Read lung window, then mediastinum, then bone. Split screen: LEFT normal anatomy, RIGHT same slice with the teaching lesion superimposed.

Slice 127 / 134 · UPPER ABDOMEN / EXIT

Slice 127 of 134. Axial chest CT. NSCLC chest CT teaching series. Station UPPER ABDOMEN / EXIT. Anatomy on this slice: Liver, spleen, kidneys, pancreas tail, remaining lung bases. How to read it: Incidental abdomen. Confirm you reviewed lung, mediastinum, bone, and tubes on the way down. No mass mapped at this exact level. Still search lungs, mediastinum, bone, and support devices. Read lung window, then mediastinum, then bone. Split screen: LEFT normal anatomy, RIGHT same slice with the teaching lesion superimposed.

Slice 128 / 134 · UPPER ABDOMEN / EXIT

Slice 128 of 134. Axial chest CT. NSCLC chest CT teaching series. Station UPPER ABDOMEN / EXIT. Anatomy on this slice: Liver, spleen, kidneys, pancreas tail, remaining lung bases. How to read it: Incidental abdomen. Confirm you reviewed lung, mediastinum, bone, and tubes on the way down. No mass mapped at this exact level. Still search lungs, mediastinum, bone, and support devices. Read lung window, then mediastinum, then bone. Split screen: LEFT normal anatomy, RIGHT same slice with the teaching lesion superimposed.

Slice 129 / 134 · UPPER ABDOMEN / EXIT

Slice 129 of 134. Axial chest CT. NSCLC chest CT teaching series. Station UPPER ABDOMEN / EXIT. Anatomy on this slice: Liver, spleen, kidneys, pancreas tail, remaining lung bases. How to read it: Incidental abdomen. Confirm you reviewed lung, mediastinum, bone, and tubes on the way down. No mass mapped at this exact level. Still search lungs, mediastinum, bone, and support devices. Read lung window, then mediastinum, then bone. Split screen: LEFT normal anatomy, RIGHT same slice with the teaching lesion superimposed.

Slice 130 / 134 · UPPER ABDOMEN / EXIT

Slice 130 of 134. Axial chest CT. NSCLC chest CT teaching series. Station UPPER ABDOMEN / EXIT. Anatomy on this slice: Liver, spleen, kidneys, pancreas tail, remaining lung bases. How to read it: Incidental abdomen. Confirm you reviewed lung, mediastinum, bone, and tubes on the way down. No mass mapped at this exact level. Still search lungs, mediastinum, bone, and support devices. Read lung window, then mediastinum, then bone. Split screen: LEFT normal anatomy, RIGHT same slice with the teaching lesion superimposed.

Slice 131 / 134 · UPPER ABDOMEN / EXIT

Slice 131 of 134. Axial chest CT. NSCLC chest CT teaching series. Station UPPER ABDOMEN / EXIT. Anatomy on this slice: Liver, spleen, kidneys, pancreas tail, remaining lung bases. How to read it: Incidental abdomen. Confirm you reviewed lung, mediastinum, bone, and tubes on the way down. No mass mapped at this exact level. Still search lungs, mediastinum, bone, and support devices. Read lung window, then mediastinum, then bone. Split screen: LEFT normal anatomy, RIGHT same slice with the teaching lesion superimposed.

Slice 132 / 134 · UPPER ABDOMEN / EXIT

Slice 132 of 134. Axial chest CT. NSCLC chest CT teaching series. Station UPPER ABDOMEN / EXIT. Anatomy on this slice: Liver, spleen, kidneys, pancreas tail, remaining lung bases. How to read it: Incidental abdomen. Confirm you reviewed lung, mediastinum, bone, and tubes on the way down. No mass mapped at this exact level. Still search lungs, mediastinum, bone, and support devices. Read lung window, then mediastinum, then bone. Split screen: LEFT normal anatomy, RIGHT same slice with the teaching lesion superimposed.

Slice 133 / 134 · UPPER ABDOMEN / EXIT

Slice 133 of 134. Axial chest CT. NSCLC chest CT teaching series. Station UPPER ABDOMEN / EXIT. Anatomy on this slice: Liver, spleen, kidneys, pancreas tail, remaining lung bases. How to read it: Incidental abdomen. Confirm you reviewed lung, mediastinum, bone, and tubes on the way down. No mass mapped at this exact level. Still search lungs, mediastinum, bone, and support devices. Read lung window, then mediastinum, then bone. Split screen: LEFT normal anatomy, RIGHT same slice with the teaching lesion superimposed.

Slice 134 / 134 · UPPER ABDOMEN / EXIT

Slice 134 of 134. Axial chest CT. NSCLC chest CT teaching series. Station UPPER ABDOMEN / EXIT. Anatomy on this slice: Liver, spleen, kidneys, pancreas tail, remaining lung bases. How to read it: Incidental abdomen. Confirm you reviewed lung, mediastinum, bone, and tubes on the way down. No mass mapped at this exact level. Still search lungs, mediastinum, bone, and support devices. Read lung window, then mediastinum, then bone. Split screen: LEFT normal anatomy, RIGHT same slice with the teaching lesion superimposed.

4. Honesty and limits

This atlas is a teaching translation of the Board Studio cine, not a dump of TCIA NSCLC-Radiomics LUNG1-001 DICOM. The OHIF viewer in the Rad Atlas widget remains the public source study. Plates are schematic split-screens (normal | superimposed) across lung, mediastinum, and bone windows. They do not replace a PACS read, a faculty over-read, or the collection’s data-use terms. Do not treat SUV, measurements, or mass location as this patient’s pixels. If a live PubMed or Wikimedia figure is open beside the cine, that figure keeps its own caption and license.
